BUDGETARY INFORMATION

Notes to Required Supplementary Information

GENERAL BUDGETARY POLICIES AND PROCEDURES

The Governor is required to submit a budget to the Legislature no later than December 20 of the year preceding odd-numbered year sessions of the Legislature.

The budget is a proposal for expenditures in the ensuing biennial period based upon anticipated revenues from the sources and rates existing by law at the time of submission of the budget. The Governor may additionally submit, as an appendix to the budget, a proposal for expenditures in the ensuing biennium from revenue sources derived from proposed changes in existing statutes.

The appropriated budget and any necessary supplemental budgets are legally required to be adopted through the passage of appropriation bills by the Legislature and approved by the Governor. Operating appropriations are generally made at the fund/account and agency level; however, in a few cases, appropriations are made at the fund/account and agency/program level. Operating appropriations cover either the entire biennium or a single fiscal year in the biennium. Capital appropriations are biennial and are generally made at the fund/account, agency, and project level.

The legal level of budgetary control is at the fund/account, agency, and appropriation level, with administrative controls established at lower levels of detail in certain instances. The accompanying budgetary schedule is not presented at the legal level of budgetary control. This is due to the large number of appropriations within individual agencies that would make such a presentation in the accompanying financial schedule extremely cumbersome. Section 2400.121 of the Governmental Accounting Standards Board Codification of Governmental Accounting and Financial Reporting Standards provides for the preparation of a separate report in these extreme cases.

For the state of Washington, a separate report has been prepared for the 2017-19 biennium to illustrate legal budgetary compliance. Appropriated budget versus actual expenditures, and estimated versus actual revenues and other financing sources (uses) for appropriated funds/accounts at agency and appropriation level are presented in the Budget-to-Actual Detail Report for governmental funds. The report is available on line at https://www.ofm.wa.gov/accounting/financial-audit-reports/comprehensive-annual-financial-report.

Legislative appropriations are strict legal limits on expenditures; over-expenditures are prohibited. All

appropriated and certain nonappropriated funds/accounts are further controlled by the executive branch through the allotment process. This process allocates the expenditure plan into monthly allotments by program, source of funds, and object of expenditure. State law does not preclude the over-expenditure of allotments.

Proprietary funds/accounts can earn revenues and incur expenses (i.e., depreciation or cost of goods sold) not covered by the allotment process. Budget estimates are generally made outside the allotment process according to prepared business plans. These proprietary fund/account business plan estimates are adjusted only at the beginning of each fiscal year.

Additional fiscal control is exercised through various means. OFM is authorized to estimate revenue and make expenditure allotments based on availability of unanticipated receipts, mainly federal government grant increases made during a fiscal year.

Operating encumbrances lapse at the end of the applicable appropriation. Capital outlay encumbrances lapse at the end of the biennium unless reappropriated by the Legislature in the ensuing biennium. Encumbrances outstanding against continuing appropriations at fiscal year-end are reported as restricted, committed, or assigned fund balance.

Budgetary Reporting vs. GAAP Reporting

Governmental funds are budgeted materially in conformance with generally accepted accounting principles. However, the presentation in the accompanying budgetary schedules is different in certain respects from the corresponding Statements of Revenues, Expenditures, and Changes in Fund Balance (governmental operating statement). In the accompanying budgetary schedules, budget and actual expenditures are reported only for appropriated activities. Expenditures are classified based on whether the appropriation is from the operating or capital budget. Expenditures funded by operating budget appropriations are reported as current expenditures classified by the function of the agency receiving the appropriations. Expenditures funded by capital budget appropriations are reported as capital outlays.

However, in the governmental operating statements, all governmental funds are included and expenditures are classified according to what was actually purchased. Capital outlays are capital asset acquisitions such as land, buildings, and equipment. Debt service expenditures are principal and interest payments. Current expenditures are all other governmental fund expenditures classified based on the function of the agency making the expenditures.

Certain governmental activities are excluded from the budgetary schedules because they are not appropriated. These activities include activities designated as nonappropriated by the Legislature. Nonappropriated

State of Washington

activities can represent a portion of a fund such as the Higher Education Special Revenue Fund or all of a fund such as the Higher Education Endowment and Tobacco Settlement Securitization Bond Debt Service Funds. Additionally, certain items including federal surplus food commodities, electronic food stamp benefits, and resources collected and distributed to other governments are also excluded because they are not appropriated.

Further, certain expenditures are appropriated as operating transfers. These transfers are reported as operating transfers on the budgetary schedules and as expenditures on the governmental operating statements.

In the General Fund, Budgetary Fund Balance equals restricted fund balance reduced by a portion that is not available for budgeting, committed, and unassigned fund balances as reported on the Governmental Funds Balance Sheet. In the Higher Education Special Revenue Fund, Budgetary Fund Balance equals the sum of restricted and committed fund balance as reported on the Governmental Funds Balance Sheet. In all other funds except Wildlife and Natural Resources, Budgetary Fund Balance equals total fund balance less nonspendable fund balance as reported on the Governmental Funds Balance Sheet. The Budgetary Fund Balance in the Wildlife and Natural Resources fund is further reduced by a portion of restricted fund balance that is not available for budgeting.

Notes to Required Supplementary Information

Methods and assumptions used in calculations of Actuarially Determined Contributions (ADC) for PERS, TRS, LEOFF, and WSPRS. The Office of the State Actuary (OSA) calculates the ADC based on the results of an actuarial valuation consistent with the state's funding policy defined under chapter 41.45 of the Revised Code of Washington(RCW). Consistent with the state's contribution rate adoption process, the results of an actuarial valuation with an odd-numbered year valuation date determine the ADC for the biennium that ensues two years later. For example, the actuarial valuation with a June 30, 2013, valuation date, completed in the fall of 2014, determined the ADC for the period beginning July 1, 2015, and ending June 30, 2017.

Methods and assumptions used in calculations of the ADC for JRS and Judges. The OSA calculates the ADC based on the results of an actuarial valuation, and sets the

ADC equal to the expected benefit payments from the plan. Consistent with the state's funding policy defined under RCWs 2.10.90 and 2.12.60, the Legislature makes biennial appropriations in order to ensure the fund is solvent to make the necessary benefit payments.

OSA calculates the ADC consistent with the methods described above. Adopted contribution rates may be different pending the actions of the governing bodies. For instance, for the period beginning July 1, 2015, and ending June 30, 2017, the contribution rates adopted by the Pension Funding Council, and unchanged by the Legislature, reflect a phase-in of the increase to contribution rates that resulted from a change to the mortality assumption. The increase is expected to be phased in over three biennia for PERS 1/2/3, TRS 1/2/3, PSERS 2, and WSPRS 1/2.

For cost-sharing plans, OSA calculates the Contractually Required Contributions (CRC) using the same assumptions and methods as the ADC except the CRC reflects the adopted contribution rates for the time period shown, which may differ from the contribution rates produced for the ADC.

Notes to Required Supplementary Information

Officers' Relief and Pension Fund

The Office of the State Actuary (OSA) calculates the Actuarially Determined Contributions (ADC) based on the

results of an actuarial valuation consistent with funding policy defined under chapter 41.24 RCW and adopted policies made by the State Board for Volunteer Fire Fighters and Reserve Officers. Consistent with the Board's contribution rate adoption process, the results of an actuarial valuation determine the ADC two years after the valuation date. For example, the actuarial valuation with a June 30, 2016, valuation date, completed in the fall of 2017, determines the ADC for the period ending June 30, 2018.

Higher Education Supplemental Defined Benefit Plans

Notes to Required Supplementary Information

The Higher Education Supplemental Retirement Plans are financed on a pay-as-you-go basis. State institutions of higher education make direct payments to qualifying retirees

when the retirement benefits provided by the fund sponsors do not meet the benefit goals. No assets are accumulated in trusts or equivalent arrangements.

Potential factors that may significantly affect trends in amounts reported include changes to the discount rate, salary growth, and the variable income investment return.

OTHER POSTEMPLOYMENT BENEFITS INFORMATION

Schedule of Changes in Total OPEB Liability and Related Ratios As of the Measurement Date June 30* (expressed in thousands)							
		2017					
Total OPEB Liability							
Service cost	\$	394,955					
Interest		184,999					
Changes in benefit terms		_					
Difference between expected and actual experience		_					
Changes in assumptions		(902,431)					
Benefit payments		(94,279)					
Other		_					
Net Changes in Total OPEB Liability		(416,755)					
Total OPEB Liability - Beginning		6,242,577					
Total OPEB Liability - Ending	\$	5,825,822					
Covered-employee payroll	\$	7,878,188					
Total OPEB liability as a percentage of covered-employee payroll		73.95 %

Notes to Required Supplementary Information

The Public Employee's Benefits Board OPEB plan does not have assets in trusts or equivalent arrangements and is funded on a pay-as-you-go basis.

Potential factors that may significantly affect trends in amounts reported include changes to the discount rate, health care trend rates, salary projections, and participation percentages.

Infrastructure Assets Reported Using the Modified Approach

Condition Assessment

The state of Washington reports certain networks of infrastructure assets under the modified approach of the Governmental Accounting Standards Board Statement No. 34. Expenditures to maintain and preserve these assets are budgeted, recorded, and reported in lieu of depreciation expense. The state must meet the following requirements to report networks of assets under the modified approach:

- Maintain an up-to-date inventory of eligible infrastructure assets in an asset management system.
- Disclose the condition level at which assets are to be

preserved or maintained, as established by administrative or executive policy, or by legislative action.

- Perform condition assessments of eligible assets and summarize the results using a measurement scale.
- Document that assets are being preserved approximately at or above the disclosed condition level.
- Annually estimate the cost to maintain and preserve the assets at the established condition level.

Assets accounted for under the modified approach include the state's network of highway pavements, bridges, and rest areas. In fiscal year 2018, the state was responsible to maintain and preserve 20,810 pavement lane miles, 3,322 bridges, and 47 highway safety rest areas.

PAVEMENT CONDITION

The Washington State Department of Transportation (WSDOT) performs highway pavement assessments over a two year cycle utilizing three measurements to develop a scaled condition assessment: Pavement Structural Condition (PSC), International Roughness Index (IRI), and rutting.

The WSDOT uses the following rating scale for PSC:

Category	PSC Range	Description
Very Good	80 - 100	Little or no distress. Example: Flexible pavement with 5% of wheel track length having "hairline" severity alligator cracking will have a PSC of 80.
Good	60 - 79	Early stage deterioration. Example: Flexible pavement with 15% of wheel track length having "hairline" alligator cracking will have a PSC of 70.
Fair	40 - 59	This is the threshold value for rehabilitation. Example: Flexible pavement with 25% of wheel track length having "hairline" alligator cracking will have a PSC of 50.
Poor	20 - 39	Structural deterioration. Example: Flexible pavement with 25% of wheel track length having "medium (spalled)" severity alligator cracking will have a PSC of 30.
Very Poor	0 - 19	Advanced structural deterioration. Example: Flexible pavement with 40% of wheel track length having "medium (spalled)" severity alligator cracking will have a PSC of 10. May require extensive repair and thicker overlays.

The IRI scale is measured in inches per mile. WSDOT assesses pavement with a ride performance measure less than 221 inches per mile to be in fair or better condition.

Rutting is measured in inches with a measurement of 0.58 inches or less assessed at a condition of fair or better.

PSC, IRI, and rutting are combined to rate a section of pavement which is assigned the lowest condition of any of the three indices.

The following table shows the combined conditions and the ratings for each index:

Category	PSC	IRI	Rutting
Very Good	80 - 100	< 96	< 0.24
Good	60 - 79	96 - 170	0.24 - 0.41
Fair	40 - 59	171 - 220	0.42 - 0.58
Poor	20 - 39	221 - 320	0.59 - 0.74
Very Poor	0 - 19	> 320	> 0.74

WSDOT's policy is to maintain 85 percent of pavements at a condition level of fair or better, based on an average condition level of the last three assessments. The following table shows pavement condition ratings for state highways:

Pavements										
Percentage in Fair or Better Condition										
	Two Year Cycle En	ding Calendar Year								
	Average of Last									
2017	2015	<u>2013</u>	Three Assessments							
93.2%	93.2%	92.8%	93.1%							

The following table reflects the state's estimated and actual expenditures necessary to preserve state highways at the established condition level:

					Paveme	ents				
	Preservation and Maintenance - Planned to Actual - Fiscal Year									
				(expressed in	thousa	nds)				
		2018		2017		2016		2015		2014
Planned	\$	263,555	\$	304,040	\$	160,423	\$	173,716	\$	122,868
Actual		271,474		264,315		161,211		142,789		143,598
Variance	\$	(7,919)	\$	39,725	\$	(788)	\$	30,927	\$	(20,730)
		-3.0%		13.1%		-0.5%		17.8%		-16.9%

Actual expenditures may vary from planned amounts for a variety of reasons which include, but are not limited to, management's decision to accelerate, defer, or reduce preservation or maintenance activity in response to economic forecasts and other factors.

For more information about pavements, refer to WSDOT's website at: http://www.wsdot.wa.gov/Business/MaterialsLab/ Pavements/default.htm.

BRIDGE CONDITION

WSDOT performs sample condition assessments on state-owned bridges in excess of 20 feet in length each year with all bridges inspected over a two year cycle. Underwater bridge components are inspected at least once every five years in accordance with Federal Highway Administration (FHWA) requirements.

WSDOT uses a performance measure established in FHWA's "Recording and Coding Guide for the Structural Inventory and Appraisal of the Nation's Bridges," which classifies the physical condition of bridges as good, fair, or poor based on structural sufficiency standards for the following bridge components: bridge superstructure, substructure, and deck. The appraisal data is collected in the National Bridge Inventory (NBI) and assigned a code from 0 to 9, with 0 being in a failed condition and 9 being in excellent condition.

Category	National Bridge Inventory Code	Description
Good	7 or 8	A range from no problems noted to some minor problems.
Fair	5 or 6	All primary structural elements are sound but may have deficiencies such as minor section loss, deterioration, cracking, spalling, or scour.
Poor	4 or less	Advanced deficiencies such as section loss, deterioration, cracking, spalling, scour, or seriously affected primary structural components.

WSDOT's policy is to maintain 90 percent of bridges at a condition level of fair or better, based on an average condition level of the last three assessments. The following table shows condition ratings for state bridges:

	Brio	lges							
	Percentage in Fair	or Better Condition							
	Two Year Cycle Ending Fiscal Year								
Average of Last 2017 2015 2013 Three Assessments									
91.8%	92.1%	91.4%	91.8%						

The following table reflects the state's estimated and actual expenditures necessary to preserve the bridges at the established condition level:

	Bridges Preservation and Maintenance - Planned to Actual - Fiscal Year									
	(expressed in thousands)									
		2018		2017		2016		2015		2014
Planned	\$	106,595	\$	45,891	\$	75,160	\$	71,078	\$	92,192
Actual		87,068		45,088		66,339		64,060		87,271
Variance	\$	19,527	\$	803	\$	8,821	\$	7,018	\$	4,921
		18.3%	•	1.7%		11.7%		9.9%		5.3%

Actual expenditures may vary from planned amounts for a variety of reasons which include, but are not limited to, management's decision to accelerate, defer, or reduce preservation or maintenance activity in response to economic forecasts and other factors.

For more information about bridges, refer to WSDOT's website at: http://www.wsdot.wa.gov/Bridge/Structures/.

SAFETY REST AREA CONDITION

WSDOT performs safety rest area condition assessments over a two calendar year cycle. Sites and buildings are divided into functional components that are assessed with a numerical rating of one to five. The rating is based on guidelines and parameters established by the WSDOT Capital Facilities Program and weighted by the criticality of the functional component.

WSDOT's policy is to maintain 95 percent of safety rest areas in a condition of fair or better. The following table shows condition ratings for safety rest areas:

Safety Rest Areas										
	Percentage in Fair or Better Condition									
	Two Year Cycle End	ding Calendar Year								
	A									
<u>2017 *</u>	<u>2015</u>	2013	Average of Last Three Assessments							
87.0%	100.0%	100.0%	95.7%							

^{*} Reporting methodology changed from fiscal year basis to calendar year basis to align with WSDOT accounting policy.

The following table reflects the state's estimated and actual expenditures necessary to preserve the safety rest areas at the established condition level:

Safety Rest Areas										
	Preservation and Maintenance - Planned to Actual - Fiscal Year									
				(expressed in	thousan	ds)				
		2018		2017		2016		2015		2014
Planned	\$	9,609	\$	9,964	\$	7,204	\$	8,463	\$	7,488
Actual		7,986		8,011		7,185		8,369		7,591
Variance	\$	1,622	\$	1,953	\$	19	\$	94	\$	(103)
		16.9%		19.6%		0.3%		1.1%		-1.4%

Actual expenditures may vary from planned amounts for a variety of reasons which include, but are not limited to, management's decision to accelerate, defer, or reduce preservation or maintenance activity in response to economic forecasts and other factors.

For more information about safety rest areas, refer to WSDOT's website at: http://www.wsdot.wa.gov/safety/restareas.
