**BUDGETARY INFORMATION**  
**Notes to Required Supplementary Information**

**GENERAL BUDGETARY POLICIES AND PROCEDURES**

The Governor is required to submit a budget to the Legislature no later than December 20 of the year preceding odd-numbered year sessions of the Legislature.

The budget is a proposal for expenditures in the ensuing biennial period based upon anticipated revenues from the sources and rates existing by law at the time of submission of the budget. The Governor may additionally submit, as an appendix to the budget, a proposal for expenditures in the ensuing biennium from revenue sources derived from proposed changes in existing statutes.

The appropriated budget and any necessary supplemental budgets are legally required to be adopted through the

passage of appropriation bills by the Legislature and approved by the Governor. Operating appropriations are generally made at the fund/account and agency level; however, in a few cases, appropriations are made at the fund/account and agency/program level. Operating appropriations cover either the entire biennium or a single fiscal year in the biennium. Capital appropriations are biennial and are generally made at the fund/account, agency, and project level.

The legal level of budgetary control is at the fund/account, agency, and appropriation level, with administrative controls established at lower levels of detail in certain instances. The accompanying budgetary schedule is not presented at the legal level of budgetary control. This is due to the large number of appropriations within individual agencies that would make such a presentation in the accompanying financial schedule extremely cumbersome. Section 2400.121 of the Governmental Accounting Standards Board Codification of Governmental Accounting and Financial Reporting

Standards provides for the preparation of a separate report in these extreme cases.

For the state of Washington, a separate report has been prepared for the 2021-2023 biennium to illustrate legal budgetary compliance. Appropriated budget versus actual expenditures and estimated versus actual revenues and other financing sources (uses) for appropriated funds/accounts at agency and appropriation level are presented in the Budget-to-Actual Detail Report for governmental funds. The report is available on line at [https://ofm.wa.gov/sites/default/files/public/accounting/report/CAFR/2022/Washington State Budget to Actual Detail Report.pdf](https://ofm.wa.gov/sites/default/files/public/accounting/report/CAFR/2022/Washington%20State%20Budget%20to%20Actual%20Detail%20Report.pdf).

Legislative appropriations are strict legal limits on expenditures; over-expenditures are prohibited. All appropriated and certain nonappropriated funds/accounts are further controlled by the executive branch through the allotment process. This process allocates the expenditure plan into monthly allotments by program, source of funds, and object of expenditure. State law does not preclude the over-expenditure of allotments.

Proprietary funds/accounts can earn revenues and incur expenses (i.e., depreciation or cost of goods sold) not covered by the allotment process. Budget estimates are generally made outside the allotment process according to prepared business plans. These proprietary fund/account business plan estimates are adjusted only at the beginning of each fiscal year.

Additional fiscal control is exercised through various means. The Office of Financial Management is authorized to estimate revenue and make expenditure allotments based on availability of unanticipated receipts, mainly federal government grant increases made during a fiscal year.

Operating encumbrances lapse at the end of the applicable appropriation. Capital outlay encumbrances lapse at the end of the biennium unless reappropriated by the Legislature in the ensuing biennium. Encumbrances outstanding against continuing appropriations at fiscal year-end are reported as restricted, committed, or assigned fund balance.

### **Budgetary Reporting vs. GAAP Reporting**

Governmental funds are budgeted materially in conformance with generally accepted accounting principles.

However, the presentation in the accompanying budgetary schedules is different in certain respects from the corresponding Statements of Revenues, Expenditures, and Changes in Fund Balance (governmental operating statement).

In the accompanying budgetary schedules, budget and actual expenditures are reported only for appropriated activities. Expenditures are classified based on whether the appropriation is from the operating or capital budget. Expenditures funded by operating budget appropriations are reported as current expenditures classified by the function of the agency receiving the appropriation. Expenditures funded by capital budget appropriations are reported as capital outlays.

However, in the governmental operating statements, all governmental funds are included and expenditures are classified according to what was actually purchased. Capital outlays are capital asset acquisitions such as land, buildings, and equipment. Debt service expenditures are principal and interest payments. Current expenditures are all other governmental fund expenditures classified based on the function of the agency making the expenditures.

Certain governmental activities are excluded from the budgetary schedules because they are not appropriated. These include activities designated as nonappropriated by the Legislature. Nonappropriated activities can represent a portion of a fund such as the Higher Education Special Revenue Fund or all of a fund such as the Higher Education Endowment and Tobacco Settlement Securitization Bond Debt Service Funds. Additionally, certain items including federal surplus food commodities, electronic food stamp benefits, and resources collected and distributed to other governments are also excluded because they are not appropriated.

Further, certain expenditures are appropriated as operating transfers. These transfers are reported as operating transfers on the budgetary schedules and as expenditures on the governmental operating statements.

In the General Fund, Budgetary Fund Balance equals restricted fund balance reduced by a portion that is not available for budgeting, committed, and unassigned fund balances as reported on the Governmental Funds Balance Sheet. In the Higher Education Special Revenue Fund, Budgetary Fund Balance equals the sum of restricted and committed fund balance as reported on the Governmental Funds Balance Sheet. In all other funds except Wildlife and Natural Resources, Budgetary Fund Balance equals total fund balance less nonspendable fund balance as reported on the Governmental Funds Balance Sheet. The Budgetary Fund Balance in the Wildlife and Natural Resources fund is further reduced by a portion of restricted fund balance that is not available for budgeting.

**PENSION PLAN INFORMATION**  
**Notes to Required Supplementary Information**

**Methods and assumptions used in calculations of Actuarially Determined Contributions for PERS, TRS, PSERS, LEOFF, and WSPRS.** The Office of the State Actuary (OSA) calculates the Actuarially Determined Contributions (ADC) based on the results of an actuarial valuation consistent with the state's funding policy defined under chapter 41.45 of the Revised Code of Washington (RCW). Consistent with the state's contribution rate adoption process, the results of an actuarial valuation with an odd-numbered year valuation date determine the ADC for the biennium that ensues two years later. The actuarial valuation with a June 30, 2019, valuation date, completed in the fall of 2020, plus any supplemental contribution rates from the preceding legislative session, determined the ADC for the period beginning July 1, 2021, and ending June 30, 2023.

**Methods and assumptions used in calculations of the ADC for the Judicial Retirement System and the Judges Retirement Fund.** The OSA calculates the ADC based on the results of an actuarial valuation, and sets the ADC equal to the expected benefit payments from the plan. Consistent with the state's funding policy defined under RCW 2.10.90 and 2.12.60, the Legislature makes biennial appropriations in order to ensure the fund is solvent to make the necessary benefit payments.

**Additional consideration on ADC for all plans.** OSA calculates the ADC consistent with the methods described above. Adopted contribution rates may be different pending the actions of the governing bodies.

**Contractually Required Contributions for PERS, TRS, PSERS, and LEOFF.** For cost-sharing plans, OSA calculates the Contractually Required Contributions (CRC) using the same assumptions and methods as the ADC except the CRC reflects the adopted contribution rates for the time period shown, which may differ from the contribution rates produced for the ADC.

Source: Washington State Office of the State Actuary

**Volunteer Fire Fighters' and Reserve Officers' Relief and Pension Fund  
Notes to Required Supplementary Information**

The Office of the State Actuary calculates the Actuarially Determined Contributions (ADC) based on the results of an actuarial valuation consistent with funding policy defined under chapter 41.24 RCW and adopted policies made by the State Board for Volunteer

Fire Fighters and Reserve Officers. Consistent with the Board's contribution rate adoption process, the results of an actuarial valuation determine the ADC two years after the valuation date. For example, the actuarial valuation with a June 30, 2020, valuation date, completed in the fall of 2021, determines the ADC for the period ending June 30, 2022.

N/A indicates data not available.

\*This schedule is to be built prospectively until it contains ten years of data.

\*\* Due to changes in legislation, assets from higher education institution plans that were previously not administered through a trust, were placed into a trust or similar arrangement. As a result, plans previously reported under GASB Statement No. 73, are now reported under GASB Statement Nos. 67/68. The change is effective for fiscal year 2021.

Note: Figures may not total due to rounding.

**Higher Education Supplemental Defined Benefit Plans  
Notes to Required Supplementary Information**

Effective fiscal year 2021, House Bill 1661 created dedicated funds to pay higher education Supplemental Retirement Plans (SRPs) benefits that mimic the trust arrangement for the rest of the state retirement systems. As a result, the plans, previously reported under GASB Statement No. 73, are now being reported under GASB Statement Nos. 67/68. Under the SRPs, state institutions of higher education make direct payments to qualifying retirees when the retirement benefits provided by the fund sponsors do not meet the benefit goals.

Under GASB 67/68, the discount rate is based on the long-term expected rate of return on the pension plan investments. This led to an increase in the discount rate used to measure the total pension liability (TPL) from 2.21 percent as of June 30, 2020, to 7.40 percent as of June 30, 2021, and a significant decrease in the TPL. In addition to the change in discount rate, the TPL is now compared against the plan's fiduciary net position to determine the net pension liability.

Note: Figures may not total due to rounding.

Source: Washington State Office of the State Actuary

**Other Postemployment Benefits Information**  
**Notes to Required Supplementary Information**

The Public Employees' Benefits Board OPEB plan does not have assets in trusts or equivalent arrangements and is funded on a pay-as-you-go basis.

Potential factors that may significantly affect trends in amounts reported include changes to the discount rate, health care trend rates, salary projections, and participation percentages.

Total OPEB liability beginning balance for the measurement date of June 30, 2018, was restated to reflect the changes in proportion between the state and the Washington Economic Development Finance Authority which operates on a cash basis and does not report an OPEB liability. The restatement also includes OPEB amounts for the Health Care Benefits Exchange which was omitted from the table in the prior year.

## Infrastructure Assets Reported Using the Modified Approach

### Condition Assessment

The state of Washington reports certain networks of infrastructure assets under the modified approach of the Governmental Accounting Standards Board Statement No. 34. Expenditures to maintain and preserve these assets are budgeted, recorded, and reported in lieu of depreciation expense. The state must meet the following requirements to report networks of assets under the modified approach:

- Maintain an up-to-date inventory of eligible infrastructure assets in an asset management system.
- Disclose the condition level at which assets are to be preserved or maintained, as established by administrative or executive policy, or by legislative action.

- Perform condition assessments of eligible assets and summarize the results using a measurement scale.
- Document that assets are being preserved approximately at or above the disclosed condition level for the three most recent complete condition assessments..
- Annually estimate the cost to maintain and preserve the assets at the established condition level.

Assets accounted for under the modified approach include the state of Washington’s network of highway pavements, bridges, and rest areas. In fiscal year 2022, the state was responsible for maintaining and preserving 20,876 pavement lane miles, 4,126 bridges and tunnels, and 47 highway safety rest areas.

### PAVEMENT CONDITION

The Washington State Department of Transportation (WSDOT) performs highway pavement assessments over a two-year cycle utilizing three measurements to develop a scaled condition assessment: Pavement Structural Condition (PSC), International Roughness Index (IRI), and rutting.

The WSDOT uses the following rating scale for PSC:

Category	PSC Range	Description
Very Good	80 - 100	Little or no distress. Example: Flexible pavement with 5% of wheel track length having “hairline” severity alligator cracking will have a PSC of 80.
Good	60 - 79	Early stage deterioration. Example: Flexible pavement with 15% of wheel track length having “hairline” alligator cracking will have a PSC of 70.
Fair	40 - 59	This is the threshold value for rehabilitation. Example: Flexible pavement with 25% of wheel track length having “hairline” alligator cracking will have a PSC of 50.
Poor	20 - 39	Structural deterioration. Example: Flexible pavement with 25% of wheel track length having “medium (spalled)” severity alligator cracking will have a PSC of 30.
Very Poor	0 - 19	Advanced structural deterioration. Example: Flexible pavement with 40% of wheel track length having “medium (spalled)” severity alligator cracking will have a PSC of 10. May require extensive repair and thicker overlays.

The IRI scale is measured in inches per mile. The WSDOT assesses pavement with a ride performance measure less than 221 inches per mile to be in fair or better condition.

Rutting is measured in inches with a measurement of 0.58 inches or less assessed at a condition of fair or better.

PSC, IRI, and rutting are combined to rate a section of pavement which is assigned the lowest condition of any of the three indices.

## State of Washington

The following table shows the combined conditions and the ratings for each index:

Category	PSC	IRI	Rutting
Very Good	80 - 100	< 96	< 0.24
Good	60 - 79	96 - 170	0.24 - 0.41
Fair	40 - 59	171 - 220	0.42 - 0.58
Poor	20 - 39	221 - 320	0.59 - 0.74
Very Poor	0 - 19	> 320	> 0.74

The WSDOT's policy is to maintain 85 percent of pavements at a condition level of fair or better, based on an average condition level of the last three assessments. Calculation of the percentages was based on vehicle miles traveled, a key data for highway planning and management and a common measure of roadway use.

The following table shows pavement condition ratings for state highways:

Pavements			
Percentage in Fair or Better Condition			
Two-Year Cycle Ending Calendar Year			
2021	2019	2017	Average of Last Three Assessments
92.5%	94.1%	93.2%	93.3%

The following table reflects the state's estimated and actual expenditures necessary to preserve state highways at the established condition level:

Pavements					
Preservation and Maintenance - Planned to Actual - Fiscal Year					
(expressed in thousands)					
	2022	2021	2020	2019	2018
Planned	\$ 139,663	\$ 211,788	\$ 194,105	\$ 227,625	\$ 263,555
Actual	119,280	124,491	169,303	269,236	271,474
Variance	\$ 20,383	\$ 87,297	\$ 24,802	\$ (41,611)	\$ (7,919)
	14.6%	41.2%	12.8%	-18.3%	-3.0%

Actual expenditures may vary from planned amounts for a variety of reasons which include, but are not limited to, management's decision to accelerate, defer, or reduce preservation or maintenance activities in response to economic forecasts and other factors. For fiscal year 2021, the 41.2 percent variance is due to a combination of decreased expenditures and an additional appropriation for the Connecting Washington Program that funded other various projects to enhance the statewide transportation system and maintain critical infrastructure.

For more information about pavements, refer to the WSDOT's website at: <http://www.wsdot.wa.gov/Business/MaterialsLab/Pavements/default.htm>.

**BRIDGE CONDITION**

The WSDOT inspects and performs condition assessments on approximately 3,316 state-owned vehicular bridges in excess of 20 feet in length. While most bridges undergo condition assessments every two years, the National Bridge Inspection Standards (NBIS) make provisions for some bridges to be inspected more or less frequently. Factors that are considered when determining the frequency of inspection include age, type of structure, span length, and condition. There are currently about 360 bridges that are inspected on a four-year cycle, and many bridges that are inspected more frequently than every two years. Underwater bridge components are inspected at least once every five years in accordance with Federal Highway Administration (FHWA) requirements.

The WSDOT uses a performance measure established in FHWA’s *Recording and Coding Guide for the Structural Inventory and Appraisal of the Nation’s Bridges*, which classifies the physical condition of bridges as good, fair, or poor based on structural sufficiency standards for the following bridge components: bridge superstructure, substructure, and deck. The appraisal data is collected in the National Bridge Inventory and assigned a code from 0 to 9, with 0 being in a failed condition and 9 being in excellent condition.

Category	National Bridge Inventory Code	Description
Excellent	9	No problem
Good	7 or 8	A range from no problems noted to some minor problems.
Fair	5 or 6	All primary structural elements are sound but may have deficiencies such as minor section loss, deterioration, cracking, spalling, or scour.
Poor	4 or less	Advanced deficiencies such as section loss, deterioration, cracking, spalling, scour, or seriously affected primary structural components.

The WSDOT’s policy is to maintain 90 percent of bridges at a condition level of fair or better, based on an average condition level of the last three assessments.

The following table shows condition ratings for state bridges:

Bridges			
Percentage in Fair or Better Condition			
Two-Year Cycle Ending Fiscal Year			
2021*	2019	2017	Average of Last Three Assessments *
94.7%	92.9%	91.8%	93.1%

\*Percentages for the 2021 assessment and the Average of Last Three Assessments were updated to correct errors in prior year’s calculations.

The following table reflects the state’s estimated and actual expenditures necessary to preserve the bridges at the established condition level:

Bridges					
Preservation and Maintenance - Planned to Actual - Fiscal Year					
<i>(expressed in thousands)</i>					
	2022	2021	2020	2019	2018
Planned	\$ 135,355	\$ 114,868	\$ 148,212	\$ 182,409	\$ 106,595
Actual	92,080	109,137	120,554	146,816	87,068
Variance	\$ 43,275	\$ 5,731	\$ 27,658	\$ 35,593	\$ 19,527
	32.0%	5.0%	18.7%	19.5%	18.3%

Actual expenditures may vary from planned amounts for a variety of reasons which include, but are not limited to, management’s decision to accelerate, defer, or reduce preservation or maintenance activities in response to economic forecasts and other factors. The significant variance between actual and planned expenditures in fiscal year 2022 can be attributed to continued insufficient resources in keeping up with increased delivery demands imposed on the WSDOT.

For more information about bridges, refer to the WSDOT’s website at: <http://www.wsdot.wa.gov/Bridge/Structures/>.

**SAFETY REST AREA CONDITION**

Beginning in fiscal year 2020, the WSDOT performs condition assessments on safety rest areas in the odd year of every fiscal biennium. Sites and buildings are divided into functional components that are assessed with a three-tiered condition scale: good, fair, and poor condition. The assessment criteria are based on guidelines that are typical of industry standards and have been modified by the WSDOT Capital Facilities Program to align with transportation-related facilities.

While the scale for condition measurement remains unchanged, both the condition rating tiers and the condition target for safety rest areas were modified effective for fiscal year 2020. The rating for a safety rest area to be considered in “fair” condition was increased from 50 percent to 60 percent under the new plan, representing a higher assessment standard than under the historical rating system.

The WSDOT’s policy is to maintain 85 percent of safety rest areas at a level of fair or better condition, based on the average condition level of the last three assessments. However, the implementation of the new condition assessment criteria in fiscal year 2020 resulted in the safety rest area condition rating falling below target in the last three assessments. Beginning in the fall of 2022, the WSDOT will evaluate the feasibility of continuing to manage safety rest areas under the same asset management plan as all other agency-owned facilities using the modified approach for reporting infrastructure. The determination will be completed before the 2023 biennium closes and will be addressed in the Required Supplemental Information of the fiscal year 2023 Annual Comprehensive Financial Report.

The following table shows condition ratings for safety rest areas:

Safety Rest Areas			
Percentage in Fair or Better Condition			
Two-Year Cycle Ending Fiscal Year *			
2021	2019*	2017*	Average of Last Three Assessments
45.7%	80.4%	80.4%	68.8%

\* The percentages for the 2017 and 2019 assessments were recalculated to reflect the new rating methodology effective July 2019.

The following table reflects the state’s estimated and actual expenditures necessary to preserve the safety rest areas at the established condition level:

Safety Rest Areas					
Preservation and Maintenance - Planned to Actual - Fiscal Year					
<i>(expressed in thousands)</i>					
	2022	2021	2020	2019	2018
Planned	\$ 6,694	\$ 8,140	\$ 9,420	\$ 11,084	\$ 9,609
Actual	7,589	7,256	8,601	9,004	7,986
Variance	\$ (895)	\$ 884	\$ 819	\$ 2,080	\$ 1,623
	-13.4%	10.9%	8.7%	18.8%	16.9%

Actual expenditures may vary from planned amounts for a variety of reasons which include, but are not limited to, management’s decision to accelerate, defer, or reduce preservation or maintenance activities in response to economic forecasts and other factors.

For more information about safety rest areas, refer to the WSDOT’s website at: <http://www.wsdot.wa.gov/safety/restareas>.
