## OVERVIEW

### Requirement and Purpose

The state of Washington owns and leases thousands of facilities that house state agencies. This represents a significant financial investment by the citizens of Washington. To monitor this investment, the Office of Financial Management (OFM) has responsibility for the completion of the Facilities Inventory System (FIS), as prescribed in [RCW 43.82.150](#). This document is a summary of the data reported by agencies in the 2015 FIS.

The 2015 Facilities Inventory is used to inform the state's Six-Year Facilities Plan, capital budget decisions, comprehensive emergency management planning and other analyses related to state facilities.

Data concerning all owned and leased facilities obligated to state agencies and higher education institutions were reported to OFM by Sept. 1, 2015. A facility is defined as a building or other structure with at least one wall, a roof and a permanent foundation, regardless of occupancy. Facilities in the inventory range from office buildings to warehouses to grain elevators to node sites, among others.

### 2015 Facilities Inventory Results

As of 2015, 75 state agencies<sup>1</sup> reported more than 10,700 facilities totaling close to 115 million square feet. Approximately 88 percent of these facilities are owned by Washington state agencies. The remaining 12 percent consist of leased facilities. State facilities are located in every county, with Garfield County having the fewest (21) and King County having the most (1,359).

Since the 2014 FIS Report, the state's facilities inventory has increased by 142 facilities and more than 2.6 million square feet. In 2015, notable changes in the state's inventory included previously unreported owned facilities statewide for the Department of Natural Resources and the Department of Transportation.

The 2015 Facility Inventory continues to demonstrate the state's commitment to creating a more complete inventory of state facilities. While these attempts have greatly increased accuracy, FIS is likely to have some missing facility records and data. OFM will continue to work with agencies on increasing the accuracy and timeliness of FIS.

The 2015 FIS, including the facility owner, location, type, condition, size of each facility and other pertinent facility data, is available at <http://www.ofm.wa.gov/budget/facilities/fis.asp>.

---

<sup>1</sup>All state agencies and higher education institutions were contacted to report their 2015 facilities inventory. All agricultural commissions are exempt from reporting per [RCW 15.04.200](#). Most legislative and judicial agencies did not report back to confirm data for their agencies for the 2015 FIS.

# STATEWIDE FACILITIES SUMMARY

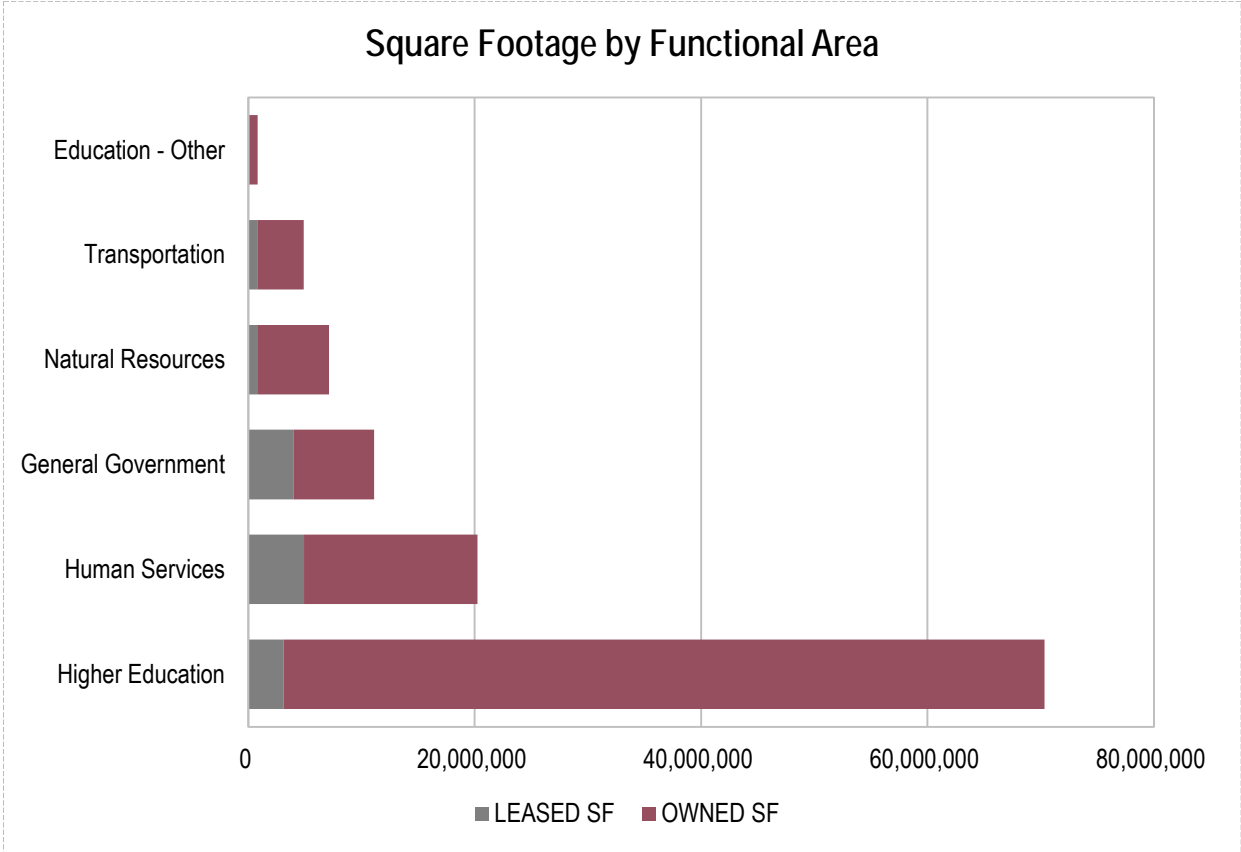

The state of Washington owns, maintains, leases or occupies more than 10,700 facilities statewide. These facilities represent the state’s physical presence in the communities it serves. State employees, volunteers, contractors and community partners perform a large variety of functions in these facilities such as educating citizens, providing social services, licensing businesses and auditing government operations. Many of the state’s facilities also serve as residences and prison facilities and in support functions.

## Total Facility Inventory Summary

In fall 2015, 75 state agencies reported approximately 10,692 facilities, totaling 114,557,583 square feet. Thirty-two agencies reported 9,395 owned facilities, totaling 100,780,481 square feet. Seventy agencies reported 1,297 leased facilities, totaling 13,777,102 square feet. Based on square footage, 88 percent of the state’s facilities inventory is owned and 12 percent is leased from the private sector.

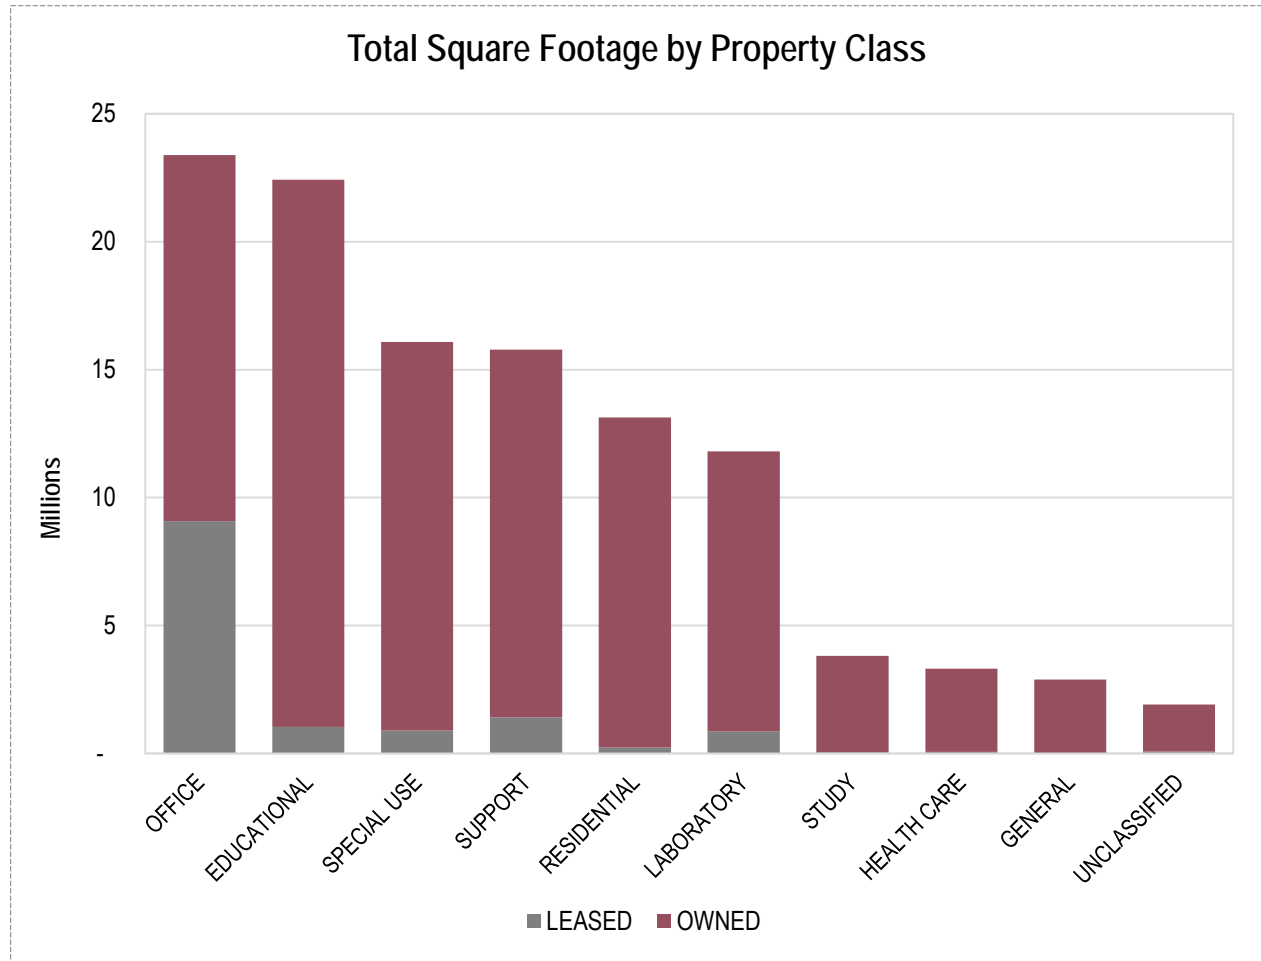

## Square Feet by Functional Area

The chart below depicts the percentage of owned versus leased square footage by functional area. The owned square footage that higher education occupies clearly dwarfs all other functional areas.

### Square Feet by Property Class

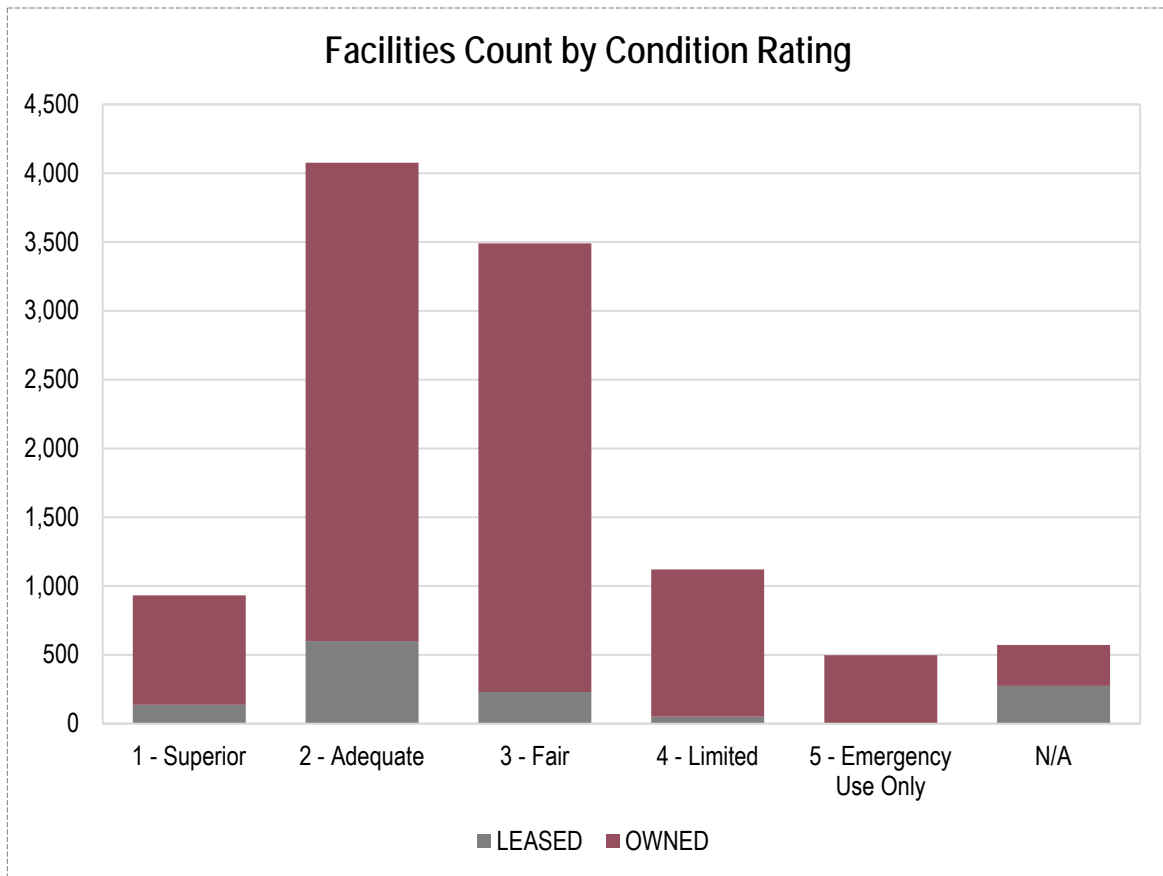

The chart below breaks down total square footage by property class for the full inventory. Property class is defined as a broad category of space composed of specific space type such as office-administrative. As with previous reports, the facilities inventory continues to indicate that facility assets are primarily used for educational, general office and health care activities. Most notably, the inventory indicates leased facilities overwhelmingly are used for office space, with more than 66 percent of the total leased space.

### Building Condition Summary

Agencies are asked to rank the general condition of each facility in their respective inventory on a scale of 1-Superior to 5-Emergent Use Only. Condition is assessed on factors such as exterior, interior, lighting, maintenance levels and building system reliability. The table below depicts the condition of all state facilities based on this scale.

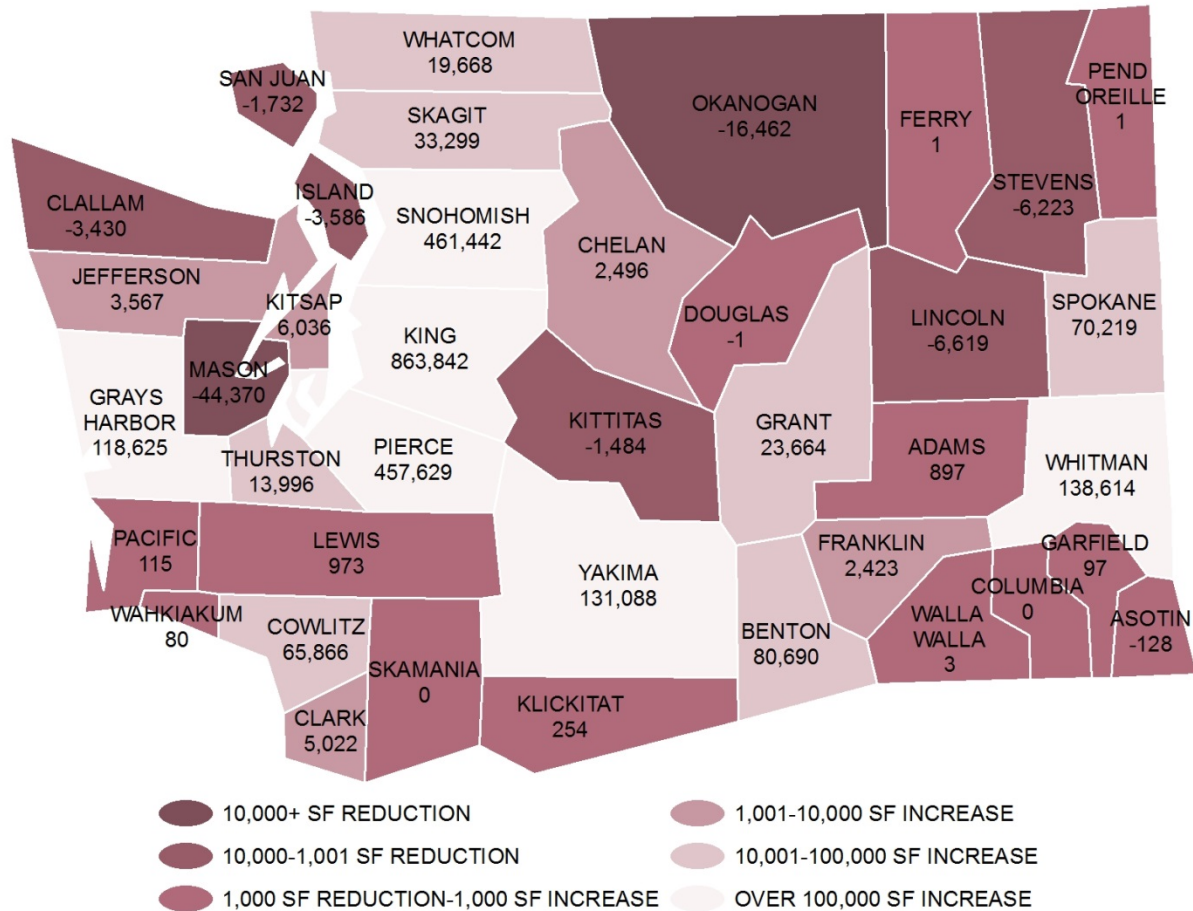

Agencies generally ranked facility conditions as either adequate (2) or fair (3). Leased facilities tend to be viewed in better condition than owned facilities. Less than 4.6 percent of the current inventory is rated as being used for Emergent Use Only.

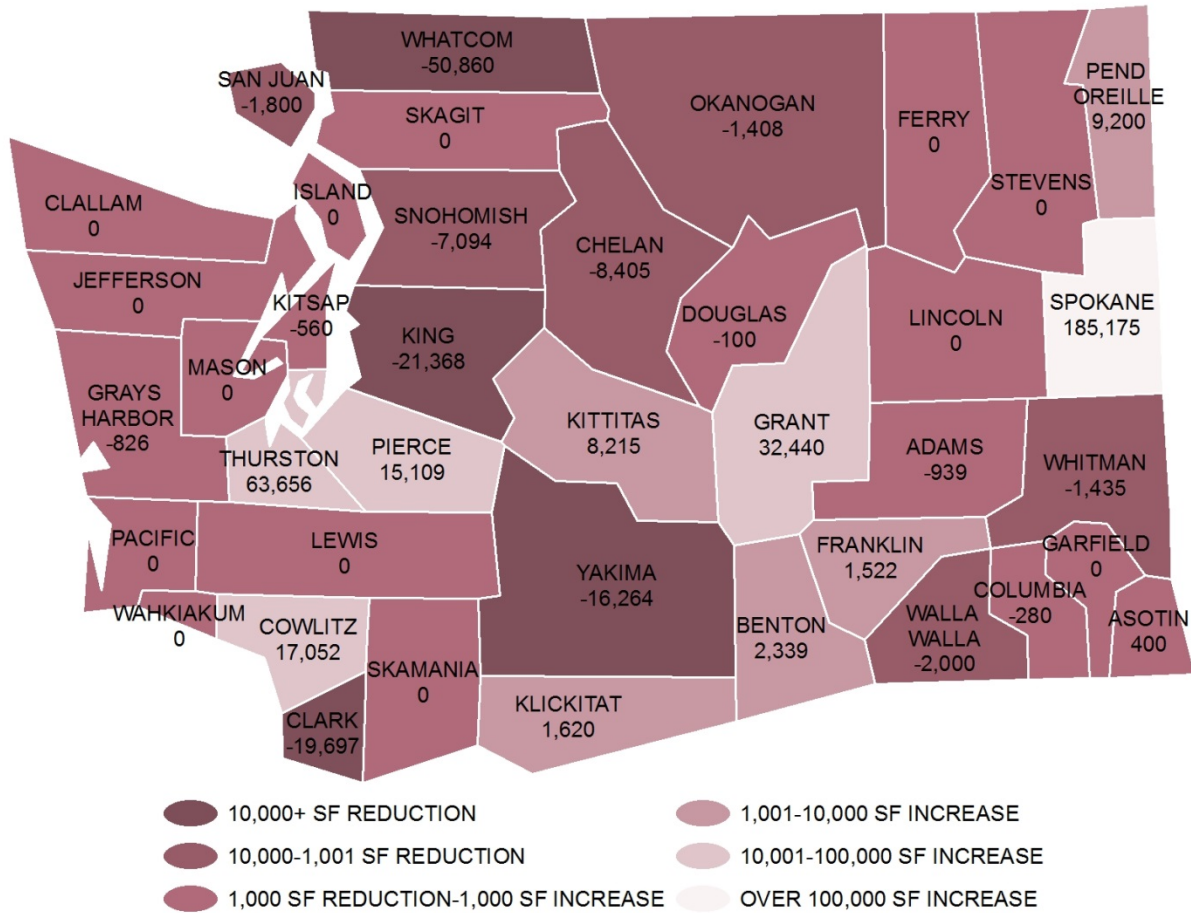

### Owned Square Feet Change by County

The map below shows the owned square footage change from the past year. Total owned square footage increased in King, Pierce and Snohomish counties by 1,783,000 square feet. This is mainly a result of the Department of Natural Resources reporting facilities on trust lands and the Department of Transportation reporting tollbooths and parking structures that were previously unreported.

### Leased Square Feet Change by County

The map below illustrates leased square footage change from the past year. Total leased square footage increased by 263,000 square feet statewide. The largest increases occurred in Spokane and Thurston counties. Spokane County increases are due to new higher education facilities. Thurston County growth includes small expansions in human services and general government. Whatcom County dropped nearly 50,000 square feet, mostly attributed to reduction in office space.

## SUMMARY OF OWNED FACILITIES IN INVENTORY

Thirty-three agencies reported 9,395 owned facilities that totaled 100,780,481 square feet. Based on square footage, the owned inventory represents 88 percent of the state’s total facilities inventory.

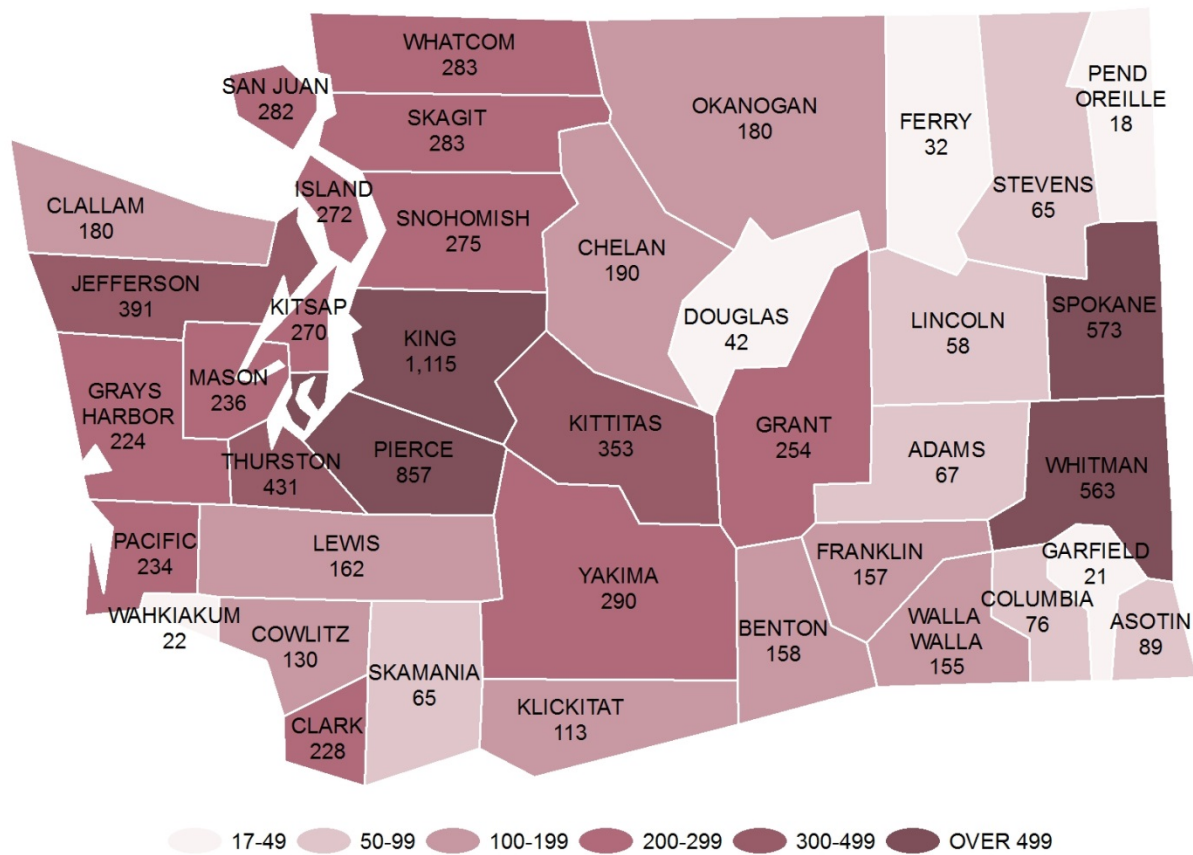

### Owned Facilities Inventory Change Between 2014 and 2015

The 2015 Owned Inventory represents an increase of 158 facilities and an increase of 2,416,576 square feet from the previous year. Notable changes to the owned inventory are:

- ▶ The Department of Natural Resources added four facilities, for an increase of approximately 620,000 square feet.
- ▶ The Department of Transportation added 104 facilities, for an increase of approximately 625,000 square feet.
- ▶ The University of Washington and Washington State University each added one facility, for a total increase of approximately 717,000 square feet.

### Density of Owned Facilities (by County)

All 39 counties have state-owned facilities, ranging from 18 in Pend Oreille County to 1,115 in King County. King, Pierce and Thurston counties have a combined 2,109 facilities, 23 percent of the owned inventory. In Eastern Washington, Spokane and Whitman counties have a total of 1,136 facilities, 12 percent of the owned inventory. The map below depicts the distribution of owned facilities by county.

### Owned Facilities by Functional Area

The table below shows the total owned square feet by functional area. Higher education represented the largest single functional area, with 2,864 owned facilities that totaled 67,239,944 square feet, or 66.7 percent of all state-owned facilities.

Owned Functional Area Breakdown				
Functional Area	Owned Square Feet	Percentage of Inventory	Owned Facilities	Percentage of Inventory
Higher Education	67,239,944	66.7	2,864	30.5
Human Services	15,323,140	15.2	1,395	14.8
General Government	7,087,806	7.0	290	3.1
Natural Resources	6,287,612	6.2	3,710	39.5
Transportation	4,100,379	4.1	1,096	11.7
Education – Other	741,600	0.7	40	0.4

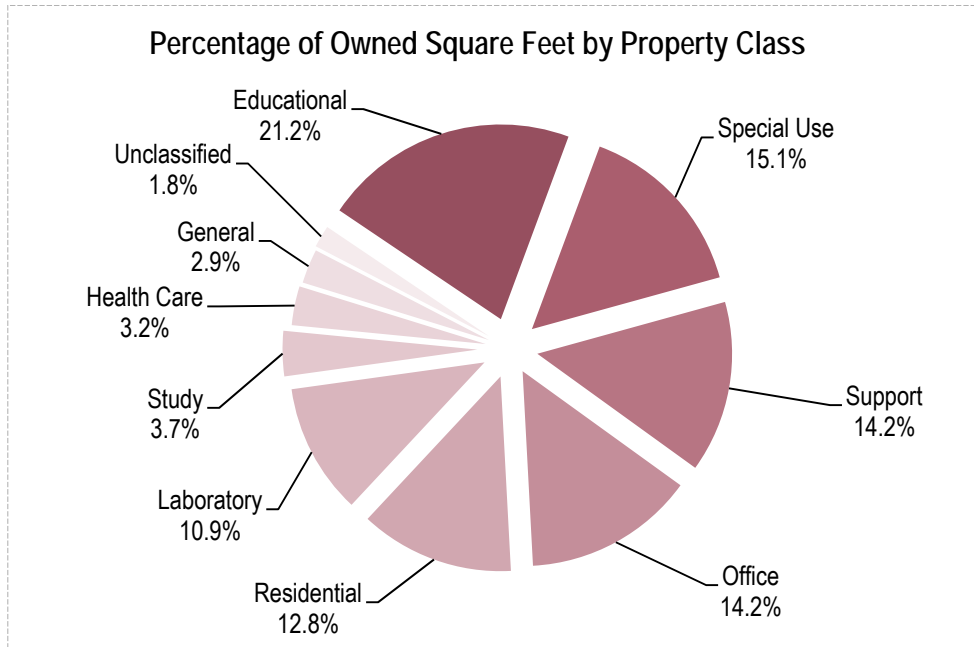

### Top Agencies for Owned Square Footage

The top 10 agencies for owned square footage in the inventory represent roughly three-fourths of the owned inventory. The University of Washington, community and technical college system and Washington State University combine for 55.6 percent of the total owned inventory.

Top Agencies for Owned Square Feet		
Agency	Square Feet	Facilities
1. University of Washington	22,110,472	566
2. Community and technical college system	20,131,975	971
3. Washington State University	13,765,598	862
4. Department of Corrections	8,602,102	817
5. Department of Social and Health Services	5,411,472	506
6. Department of Enterprise Services	5,401,550	92
7. Department of Transportation	3,502,304	938
8. Western Washington University	3,400,717	117
9. Central Washington University	3,262,900	189
10. State Parks and Recreation Commission	3,057,272	2,628

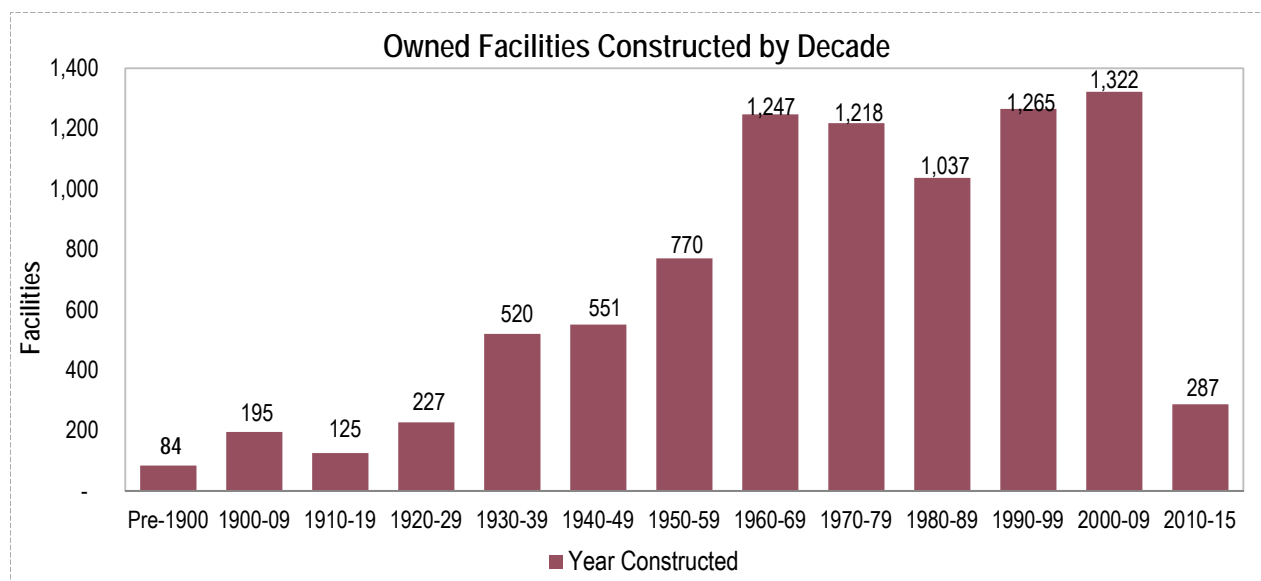

### Owned Space by Property Classification

Property classification is organized into 10 categories, which are then further defined into nearly 40 specific space types. FIS defines the property classification as more than 60 percent of the facility space dedicated to one category. The chart below depicts the percentage of facilities by property classification. Close to 50 percent of owned facilities are used primarily for such things as higher education classrooms, general offices and correctional facilities.

### Age of Owned Facilities

Today, the state owns 84 facilities constructed before 1900 and more than 300 facilities older than 100 years. The Jackson House in Chehalis, owned by the State Parks and Recreation Commission, is the oldest facility, with a construction date of 1845. Older facilities are typically used for historic, education and residential purposes. At the other end of the spectrum, 287 facilities have been constructed since 2010. Newer facilities tended to be used for residential and storage needs.

### Condition of Owned Facilities

Agencies were asked to rank their facilities condition on a scale of 1-Superior to 5-Emergent Services Only. Condition is assessed based on factors such as exterior, interior, lighting, maintenance levels and building system reliability. The table below shows the condition of state-owned facilities based on this scale, which is a high-level snapshot. A more thorough approach to condition assessment is needed for more robust information.

Owned Facility Condition Breakdown			
	Facility Condition Rating	Number of Facilities	Percentage of Inventory
1	Superior – High level of satisfaction with facility; maintenance emergencies rare	795	8.5
2	Adequate – Satisfaction with facility; usual maintenance takes about a week to complete; occasional maintenance emergencies	3,476	37.0
3	Fair – Basis level of service, lack of pride in physical exterior; maintenance takes up to one month to complete; high number of emergencies	3,261	34.7
4	Limited Functionality – Low level of service; negative experiences in functionality and responsiveness; maintenance takes up to one year to complete	1,070	11.4
5	Emergent Services Only – Services not available unless emergent; consistent customer ridicule; mistrust of facility services, reactive maintenance is the norm	494	5.3
N/A	Not Assessed – Agency has not assessed facility or did not report	299	3.2

## SUMMARY OF LEASED INVENTORY

Sixty-eight agencies reported 1,297 leased facilities that totaled 13,777,102 square feet. Based on square footage, the leased inventory represents 12 percent of the state's total facilities inventory.

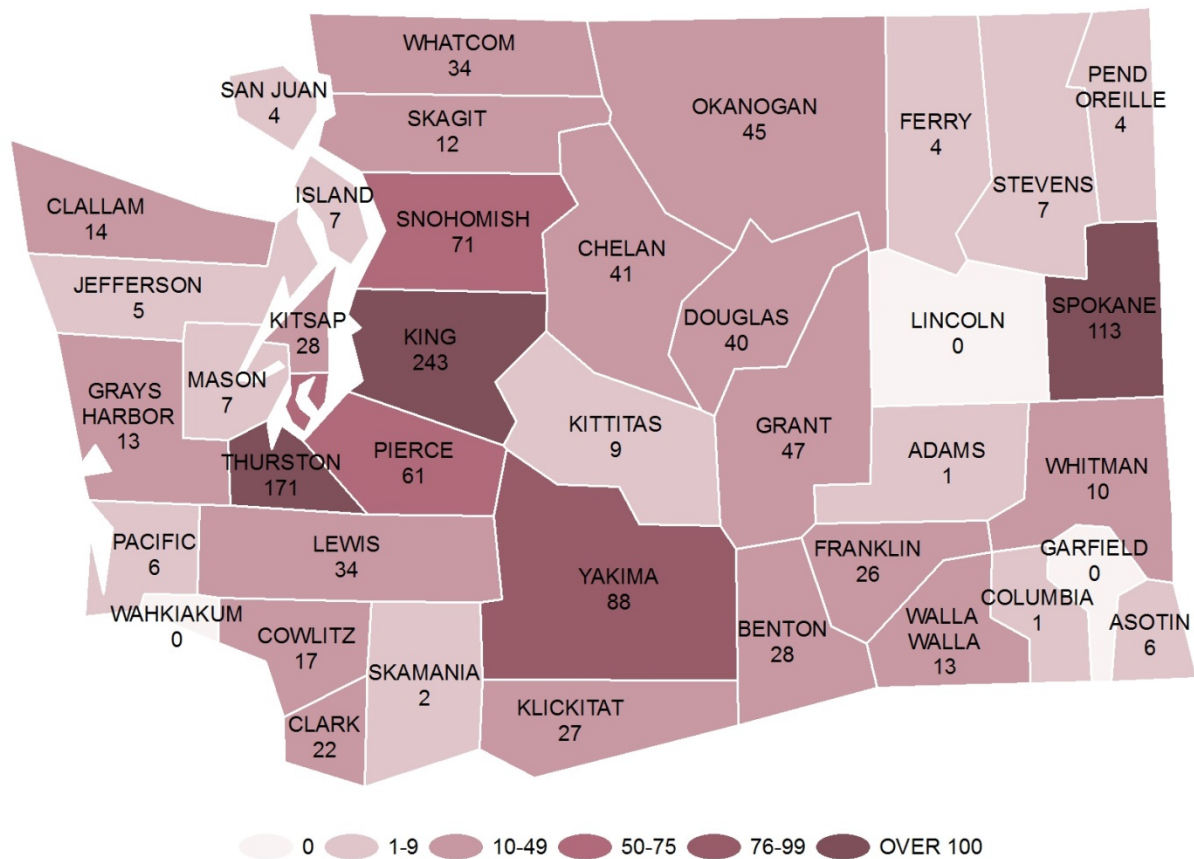

### Leased Facilities Inventory Change Between 2014 and 2015

The 2015 leased inventory represents a decrease of 12 facilities and an increase in 262,901 square feet from 2014. Notable changes to the leased inventory are:

- ▶ The community and technical college system added eight facilities totaling 202,000 square feet for educational and administrative needs.
- ▶ The Administrative Office of the Courts reported three facilities in 2015 totaling 68,000 square feet.

### Density of Leased Facilities (by County)

Thirty-five counties have state-leased facilities. Three counties have more than 100 leased facilities: King has 244, Thurston has 174 and Spokane has 113. Wahkiakum, Lincoln and Garfield counties have no state-leased facilities. The map below depicts the distribution of leased facilities by county.

### Leased Facilities by Functional Area

The table below depicts the total leased square feet by functional area. Human services represented the largest single functional area, with 303 leases that totaled 4,915,355 square feet, or 35.8 percent of all state-leased facility space.

Leased Square Footage by Functional Area				
Functional Area	Lease Square Feet	Percentage of Inventory	Leases	Percentage of Inventory
Human Services	4,915,355	35.8	303	23.4
General Government	3,965,299	28.9	256	19.8
Higher Education	3,109,706	22.7	283	21.9
Natural Resources	848,708	6.2	324	25.1
Transportation	801,873	5.8	108	8.4
Education	75,500	0.6	19	1.5

### Top Agencies for Leased Square Footage

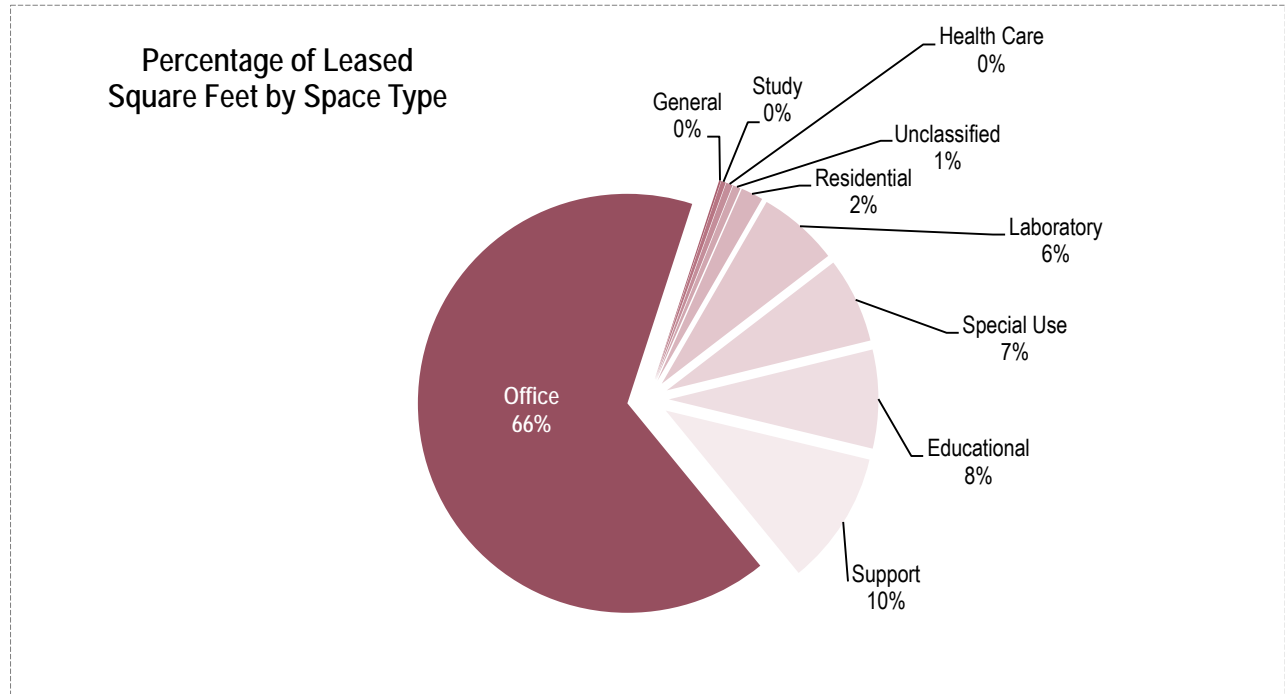

The table below shows the top 10 agencies with the most leased square footage. The Department of Social and Health Services accounts for 19.7 percent of the total leased inventory.

Top Agencies for Leased Square Feet		
Agency	Square Feet	Leases
1. Department of Social and Health Services	2,698,758	132
2. University of Washington	1,741,425	166
3. Military Department	1,334,765	127
4. Community and technical college system	1,073,824	77
5. Employment Security Department	561,807	46
6. Department of Corrections	490,897	66
7. Office of Attorney General	456,317	17
8. Department of Health	456,057	10
9. Consolidated Technology Services	398,196	6
10. Department of Licensing	353,634	57

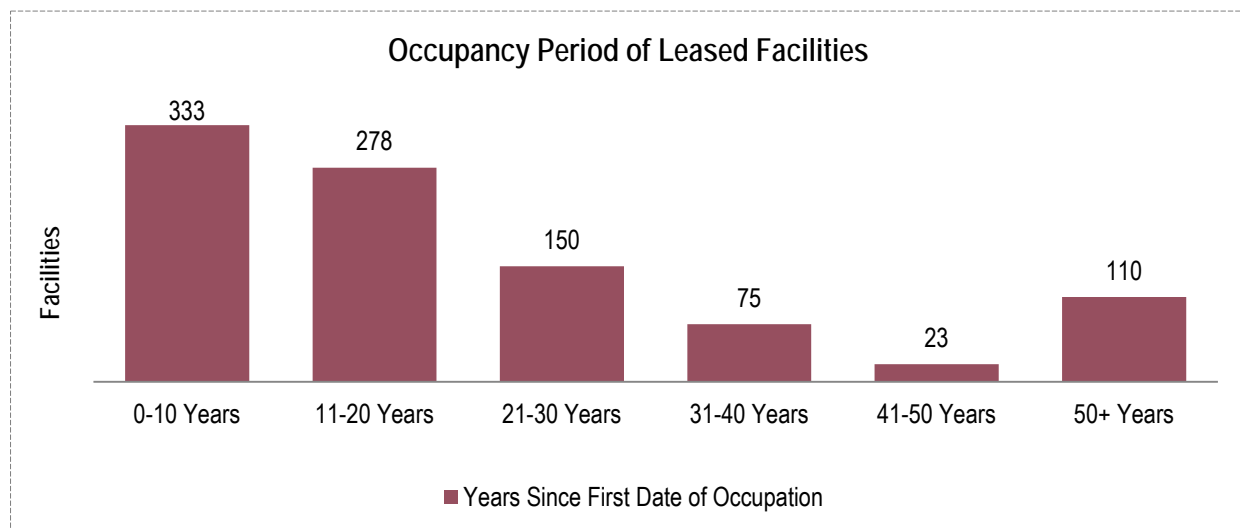

### Leased Facilities Space by Property Classification

Property classification is organized into 10 categories, which are then further defined into nearly 40 space types. FIS defines the property classification as more than 60 percent of the facility space dedicated to one category. The chart below depicts the percentage of facilities by property classification. FIS shows that leased facilities are used primarily for office space.

### Occupancy Period of Leased Facilities

Agencies were asked to provide the known date when they first started leasing from their current location. Approximately 133 facilities have a known occupancy of more than 40 years. Most of these facilities are used by State Parks and Recreation and the Military Department. No first year of occupancy was noted for 328 facilities.

### Condition of Leased Facilities

Agencies were asked to rank their facilities condition on a scale of 1-Superior to 5-Emergent Services Only. Condition is assessed on factors such as exterior, interior, lighting, maintenance levels and building system reliability. The table below shows the condition of state leased facilities based on this scale. A more thorough approach to condition assessment is needed for more robust information.

Facility Condition Breakdown			
Facility Condition Rating		Number of Facilities	Percentage of Inventory
1	Superior – High level of satisfaction with facility; maintenance emergencies rare	138	10.6
2	Adequate – Satisfaction with facility; usual maintenance takes about a week to complete; occasional maintenance emergencies	600	46.3
3	Fair – Basic level of service; lack of pride in physical exterior; maintenance takes up to one month to complete; high number of emergencies	230	17.7
4	Limited Functionality – Low level of service; negative experiences in functionality and responsiveness; maintenance takes up to one year to complete	51	3.9
5	Emergent Services Only – Services not available unless emergent; consistent customer ridicule; mistrust of facility services; reactive maintenance is the norm	4	0.3
Not assessed – Agency failed to fill in requested data		274	22.1

### Real Estate Authority

Washington has a decentralized model for authority over state real estate. Three primary real estate authorities are defined in FIS, based on state laws:<sup>2</sup> 1) the Department of Enterprise Services; 2) state agencies leasing through statutory exemption or delegation from the Department of Enterprise Services; and 3) higher education. The table below depicts the proportion of each real estate authority.

Real Estate Authority Breakdown				
Real Estate Authority	Total Square Footage	Percentage of Inventory	Total Facilities	Percentage of Inventory
Department of Enterprise Services	9,145,557	66.4	602	46.4
State Agency	2,537,207	18.4	471	36.3
Higher Education	2,094,338	15.2	224	17.3

<sup>2</sup> See [RCW 43.82.010\(13\)](#) and [RCW 28B.10.020](#) for more information.

### Real Estate Authority Cost Breakdown

The table below displays the annual lease cost by real estate authority. Approximately 371 leases indicated no monthly rent and were not included in the totals below. A majority of these were from the Military Department and State Parks and Recreation.

Costs by Real Estate Authority				
Real Estate Authority	Annual Rent	Total Square Feet	Average Cost per Square Foot	Unknown or No Rent Square Footage
State Agency	\$27,955,297	2,537,207	\$11.02	1,677,745
Department of Enterprise Services	\$161,464,884	9,145,557	\$17.66	41,755
Higher Education	\$62,625,089	2,094,338	\$29.90	205,572
State Total	\$252,045,270	13,777,102	\$18.29	1,925,072

### Lease Options

The table below displays the number of cancellation clauses associated with leases by real estate authority. These numbers indicate roughly a third of all state leases combined have a cancellation clause.

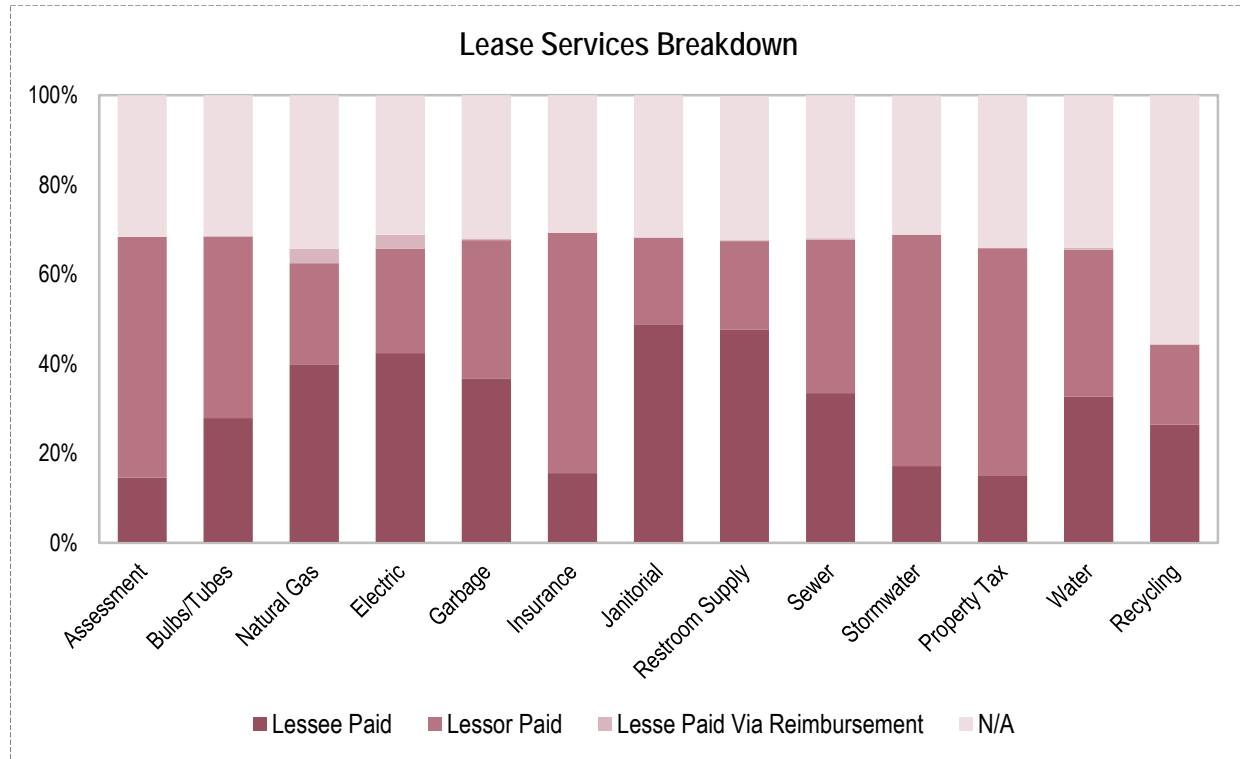

Cancellation Clause Breakdown		
Real Estate Authority	Cancellation Clause	Percentage of Overall Leased Facilities
State Agency	266	20.5
Department of Enterprise Services	236	18.2
Higher Education	31	2.4
State Total	533	41.4

Agencies were also asked how many of the leases they controlled had an option to purchase. Only 10 leases were reported as having this option: State Agency – four, Enterprise Services – five, Higher Education – one.

### Lease Services

The 2015 leased inventory indicates that the state typically pays for natural gas, electric, garbage, restroom supplies and janitorial services. Owners are more likely to pay for assessments, insurance, stormwater and property taxes. Recycling was one area most agencies indicated was not an option.

The table below depicts the percentage of each service paid by the state and by the owner. More complete information is expected to be gathered in future reports to further break down facility costs.

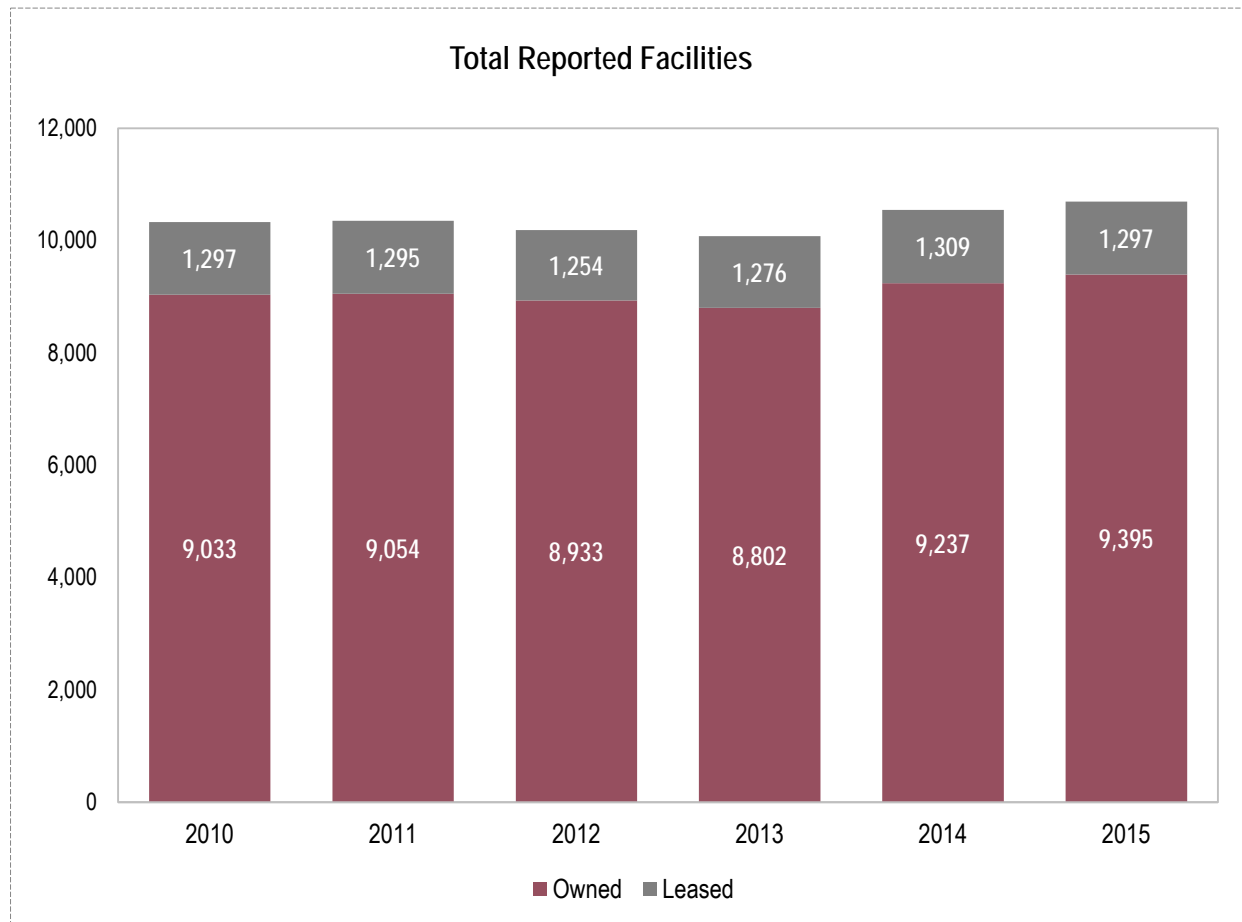

## 2010–15 FACILITIES INVENTORY TREND

Since 2010, OFM has prepared a summary report of the owned and leased facilities inventory. This information equips the state of Washington to better strategize for efficiency and cost savings related to facilities. Below, OFM has prepared a trend summary to demonstrate how the state has reported owned and leased facilities over the past six years.

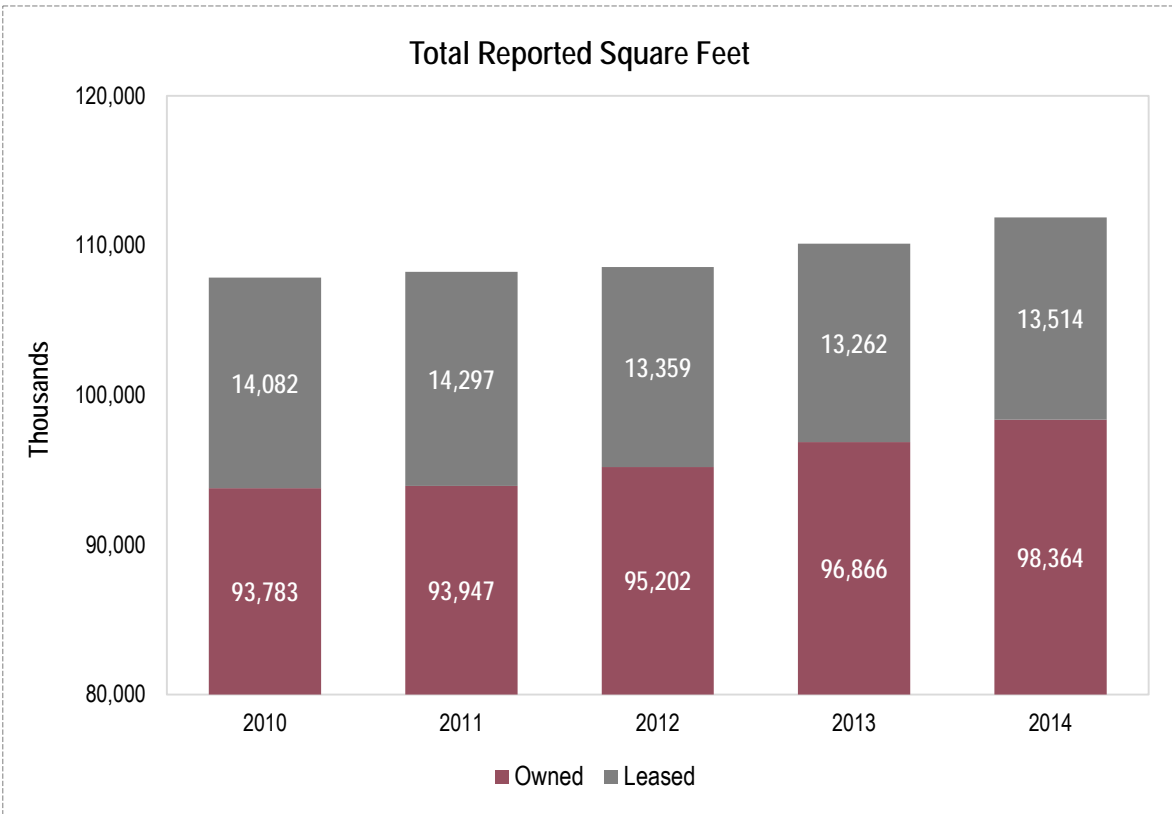

### Total State Facilities by Year

The six-year trend shows the total number of state facilities has increased since 2010. In 2015, agencies reported a number of facilities that had not been identified earlier. Since 2010, the state total has grown by approximately 362 reported facilities, or more than 3.5 percent.

### Total Square Footage by Year

The six-year trend demonstrates that the total square footage has decreased on the leased side by nearly 305,000 square feet. However, these decreases were more than offset by the 7 million square feet of new square footage reported for owned facilities. Much of this increase can be attributed to higher education. Since 2010, total state-occupied square footage increased by 6.7 million, more than 5.8 percent.

### QUESTIONS/COMMENTS

For questions about the FIS process, instructions or results, or to provide feedback, please contact these OFM staff members:

## APPENDIX A: FACILITIES DEMOGRAPHICS BY AGENCY

The following chart is a summary by agency of the total facilities and total square footage (by leased and owned facilities) for all types of facilities. The chart is sorted by the percentage of total inventory which is provided, based on the total square footage.

Agency Name	Number of Owned Facilities	Number of Lease Facilities	Total Number of Facilities	Total Owned Square Footage	Total Leased Square Footage	Total Square Footage	Percentage of Total Inventory	Sq. Ft Change from 2014
