## Data Sources and Notes

The original data source for this document is the U.S. Census Bureau's American Community Survey (ACS) 1-year Public Use Microdata Sample (PUMS) file. The Washington State Office Financial Management (OFM) used the ACS data, along with other population data from the OFM, as input to its County Population Estimation Model (CPEM) to produce county-level health insurance coverage estimates.

In working with the ACS data, OFM analysts uncovered a significant increase of undercount of Medicaid enrollment in Washington starting in 2014, the year the Patient Protection and Affordable Care Act (ACA) first rolled out Medicaid expansion program. A decision was made to adjust for the undercount of Medicaid in the 2014 and 2015 ACS before the ACS data were used in the CPEM.

For this document, the statewide estimates were calculated using the ACS 1-year PUMS for 2011-13 and the adjusted ACS for 2014-15. The county-level estimates were calculated using the OFM CPEM.
