

## 477 - Department of Fish and Wildlife

### A001 Administration

Administration encompasses a wide variety of activities that support the overall management of the agency. This activity begins with the executive management for the agency that provides the leadership, direction, and policy recommendations used in carrying out the agency's statutory obligations, commission policies, and agency goals. The functions that support executive management include administrative services, financial services, employee services, regional and field office operations, and external communications. Administrative services include program and office support, program budgeting, contracting and inventory, records management, policy development, legislative activities, print shop and mailroom, internal communications, and customer service. Financial Services include budget, contracts, fiscal oversight, revenue, revolving funds, indirect costs, and comptroller responsibility. Employee Services encourages professional development for employees through training, continuing education, professional accreditation, workshops, and/or conferences. Regional and field office operations support the operation and management of agency-operated administrative offices, wildlife areas, and hatcheries.

### A002 Conduct Fish and Wildlife Laboratory Activities

Appropriation Period: 2005-07 Activity Version: 81 - 2007 Enacted Supplemental Budget

The Washington Department of Fish and Wildlife’s (WDFW) fish and wildlife laboratory provides biological, pathological, scale, and genetic analysis in support of all agency programs. Laboratory studies provide information to the agency to support fish and wildlife species management and policy.

**A003 Conduct Fish and Wildlife Production Activities**

Commercial and recreational fishing and hunting opportunities are supplemented through state-run fish hatcheries and game farms. Each year, the department releases roughly 171 million salmonids (chinook, coho, steelhead, chum) and 25 million gamefish (i.e., trout, bass, crappie, etc.) from state-operated hatcheries, and rears 40,000 pheasants for release into rivers, lakes, and/or uplands. Additional functions related to this activity include winter feeding of deer and elk, providing barley for birds, and supplementing feed for other hunted species. Fish and wildlife production activities contribute to increased recreational and commercial hunting and fishing opportunities with the goals of enhancing local economies and conserving fish and wildlife species.

**A005 Conduct Research of Fish, Wildlife, and Habitat**

The agency conducts fish and wildlife research activities to expand scientific understanding of the ecological needs of fish and wildlife species and their associated habitat. Research activities also focus on the development of new methods and studies that determine population parameters of species and the ecological relationship with their habitat.

**A007 Coordinate Tribal Fish, Wildlife, and Habitat Policy and Management**

Fish and wildlife resources are jointly managed by the department and the treaty tribes within the state. Joint responsibility for the management of fish and wildlife species and their habitat is needed to ensure that agreed upon harvest management and/or species conservation goals are met. Additional functions within this activity include departmental resources providing technical, policy, and programmatic support to tribal governments to ensure the implementation of federal court orders relative to treaty fishing and hunting rights. In many cases, the tribes and the department implement joint fishing and hunting agreements and joint data collection efforts. An example of data sharing with the tribes is through the Salmon, Steelhead Habitat Inventory Assessment Program (SSHIAP). Watershed level information is collected and made available through SSHIAP.

**A008 Develop and Maintain Agency Information Systems**

Sound management of fish and wildlife species and their habitat depends upon access to accurate and credible information by agency executives, staff, and commissioners. This activity maintains and develops information systems that support fiscal, accounting, and licensing systems; corporate information systems infrastructure; and hardware and software needs.

**A009 Develop Fish and Wildlife Non-Hunting and Fishing Rules**

The state Fish and Wildlife Commission provides oversight of the agency and is the rule-making and policy-setting authority for the agency. The commission establishes rules and/or policies that guide agency activities related to the protection and conservation of all fish and wildlife species (and associated habitat) in the state, including rules pertaining to commercial and recreational licensing, grazing, use of WDFW-owned or managed lands, and state listing of endangered and threatened fish and wildlife.

**A010 Develop Habitat Conservation and Species Management and Recovery Plans**

Maintaining healthy and diverse habitat and populations of all fish and wildlife species is a priority of the department. To better protect and enhance those species whose populations are not considered healthy, the department implements a multi-species, habitat-based approach to developing habitat conservation, species management, and recovery plans.

**A011 Ensure Compliance of Fish and Wildlife Regulations**

*Appropriation Period: 2005-07 Activity Version: 81 - 2007 Enacted Supplemental Budget*

Compliance with state fish, wildlife, and habitat rules and regulations requires active agency participation with the recreational and commercial fishing, hunting, and wildlife viewing public. The department’s enforcement efforts consist of public education of the laws, rules, and regulations, as well as active enforcement, investigation, and prosecution of fishing, hunting, and hydraulic permit application violations. To increase compliance, the agency’s management and enforcement programs regularly review and improve regulations to ensure they are understandable and achieve the desired protection and/or harvest goals.

**A012 Ensure Department Compliance with ESA and Other Government Regulations**

The long-term health and recovery of state fish and wildlife populations is paramount to the agency's mission. Therefore, departmental operations ensure that all agency activities are in compliance with local, state, and/or federal regulations that protect and recover fish, wildlife, and their habitats. Specific agency resources are focused on complying with the Endangered Species Act (ESA) and State Environmental Policy Act (SEPA), as well as the issuance of National Pollution Discharge Elimination System (NPDES) permits, ESA Take Permits, and/or the implementation of Hatchery Genetic Management Plans.

**A013 Manage Department of Fish and Wildlife Lands for Non-Resource Purposes**

To accommodate the diverse needs of the public, WDFW-owned land management actions within this activity are primarily directed at fire and weed control on agency lands. There are also a few recreational activities not related to hunting, fishing, and wildlife viewing, such as rock climbing and road rallies.

**A014 Manage Fish and Wildlife Harvest**

Successful management of fishing and hunting seasons requires significant preparation and collection of data to ensure appropriate harvest of individual species. A primary activity conducted by the agency is the mass marking program that marks fish species so legally harvestable hatchery fish may be distinguished from unharvestable wild or endangered fish in selective fisheries. Other work within this activity includes estimating and monitoring fish and game animal harvest, sampling for age distribution, angler field checks (creel sampling), hunter deer and elk check stations, and harvest data analysis and questionnaires. Catch record cards and harvest reports are two methods of collecting fish and wildlife consumption information.

**A015 Manage Fishing and Hunting Seasons**

The state Fish and Wildlife Commission provides oversight of the agency and is the rule-making and policy-setting authority for the agency. Specific actions undertaken by the commission and the department within this activity include the development of all policies relating to setting fishing and hunting seasons; the taking of public comment on fishing and hunting issues, rules, and regulations; the establishment of allocations between commercial and recreational users; and the issuance and management of licenses through the WILD system.

**A016 Manage Landowner Access Agreements**

Providing recreational opportunities on agency-owned land and other state-owned lands is a priority for the department in order to maximize the value of department-issued licenses and permits. To further increase the value of such licenses and permits, the department often enters into agreements with private landowners to provide other access points for hunting, fishing, and wildlife viewing opportunities. Specific activities relate to developing and maintaining landowner access agreements, including feel free to hunt, hunt by permission, and road management arrangements.

**A017 Manage Populations of Species of Concern**

Numerous fish and wildlife species within the state are listed as a "threatened" species, "endangered" species, or "species of concern," as their populations are rapidly declining and/or they are in danger of extinction. In order to increase the potential for recovery of these species, the department implements artificial propagation, captive breeding, and/or translocation programs to conserve and protect individual species. Examples of species covered under this activity include pygmy rabbits, big horn sheep, White River spring chinook, and upper Columbia River steelhead.

**A018 Manage Problem Wildlife**

State population growth and development in more rural areas have increased interaction between people and specific species defined as problem wildlife. Most problem wildlife interactions consist of damage to agricultural, horticultural, and rangeland crops and negative encounters with bear and cougar. To prevent such damage, the agency implements a fencing program to contain wildlife species on state lands. It also processes, investigates, and if substantiated, pays claims for agricultural crop damage caused by wildlife. Additionally, the agency responds to wildlife nuisance complaints and threats to public safety. If necessary, the department removes the threat through relocation and/or euthanasia.

**A019 Manage Recreational Access Sites for Public Use**

In order to meet the needs of an increasing population, the department strives to provide access to areas where fish and wildlife can be enjoyed through hunting, fishing, and/or wildlife viewing. The department manages over 600 access sites to provide increased opportunity for the public to interact with fish and wildlife species.

**A020 Manage Watchable Fish and Wildlife Recreation**

Appropriation Period: 2005-07 Activity Version: 81 - 2007 Enacted Supplemental Budget

National surveys published by the U.S. Fish and Wildlife Service estimate that over \$980 million is spent within the state on non-consumptive fish and wildlife recreation activities. Non-consumptive activities usually consist of wildlife viewing opportunities, such as bird watching or whale watching, which often take place in rural areas. In an effort to encourage non-consumptive fish and wildlife activity and promote rural economic development, the department implements programs to increase the number of watchable fish and wildlife sites and events throughout the state. Examples include development of fish and wildlife viewing sites and informational material, promotion of fish and wildlife appreciation festivals in local communities, and the backyard wildlife sanctuary program.

Under the authority of the Legislature, the agency approves or denies hydraulic permit applications designed to protect fish life. Additionally, the agency participates actively in identifying fish protection needs such as placement of screens to protect fish from entering irrigation waterways. Other protection activities include habitat acquisition and securing conservation easements. This category also includes activities related to oil spill response and damage assessment.

**Statewide Result Area: Improve the quality of Washington’s natural resources**

**Statewide Strategy: Preserve, maintain and restore natural systems and landscapes**

**Expected Results**

Number of screens replaced to meet state fish protection standards by the agency. Number of new acres of critical habitat protected through conservation easements or land acquisitions by the agency.

**A023 Protect Human, Fish and Wildlife Health**

Numerous types of fish, shellfish, and wildlife species are consumed by the public. Therefore, the department, in conjunction with the Department of Health, ensures that these species are safe for human consumption through the regular testing of species for adverse human impacts. The most common examples are tests for chronic wasting disease in deer and elk or domoic acid (red-tide) levels in shellfish. This activity also involves the development of strategies, education, and outreach programs, and the enforcement and coordination efforts (within the agency and other agencies) designed to protect public health.

**A027 Provide Technical and Policy Assistance**

Management of fish, wildlife, and their habitat requires significant coordination between stakeholders to ensure species protection and sufficient recreational and commercial opportunities. The department regularly provides its technical expertise and policy direction both internally and externally to stakeholders, including private citizens, local, state, and federal governmental agencies, and other countries. Specific activities performed by the department include policy analysis, development, and negotiation to improve fish, wildlife, and habitat protection; participation and leadership in multi-party negotiations; review of state and federal laws; and technical and policy review and/or comment on other agency activities, permits, and documents. Issue areas include the Growth Management Act, Forest Protection Act, SEPA review of other agency activities, watershed steward teams, cooperative compliance, participation in the Transportation Permit Effectiveness and Accountability Committee, salmon recovery, and lead entities.
