

Greetings,

I apologize for the later response but can you please update the Agency Contingency plans portion of the Contingency website and include this email under the 2017 plan update section as "No update?" Some employees aren't seeing the note directing them back to the 2013 plan and think we don't have a plan.

We have reviewed our government shutdown contingency planning documents from 2013 and find that no major changes are necessary at this time for purposes of contingency planning for a potential government shutdown in July of this year.

Please contact me if you have any questions or if you need any additional information.

Thanks,

Walter Hamilton
Acting Chief Financial Officer
Washington Department of Agriculture
