

STATE OF WASHINGTON
AGENCY NAME
SOLE SOURCE ADVERTISEMENT

The Office of Financial Management contemplates awarding a sole source contract to Regional Economic Modeling Incorporated (REMI) for a two month period to provide economic modeling consultation related to carbon emissions limitations.

REMI are uniquely qualified to provide modeling consultation because of the respected model they have created and used for similar analysis. In addition to their general expertise developed over decades of improvement to their economic model, REMI have been providing similar analyzes for other states. The REMI Tax PI model is the only model created specifically for the purpose of analyzing economic impact of both the change in tax burden and the change in government expenditures. REMI staff also have a proprietary version of CTAM, a widely respected application for estimating energy prices and carbon output.

The contract will be issued on or about June 2, 2016.

Vendors who believe they possess the same experience and capabilities, and meet the same requirements as REMI, are required to submit capability statements detailing their ability to meet the state's requirements within five (5) business days of this announcement. In the absence of other qualified sources, it is the state's intent to make a sole source award of the contract.
