*Metropolitan Statistical Areas have at least one urbanized area of 50,000 or more population, plus adjacent territory that has a high degree of social and economic integration with the core as measured by commuting ties. If the specified criteria are met a Metropolitan Statistical Area containing a single core with a population of 2.5 million or more may be subdivided to form smaller groupings of counties referred to as Metropolitan Divisions.*

*Micropolitan Statistical Areas –have at least one urban cluster of at least 10,000 but less than 50,000 population, plus adjacent territory that has a high degree of social and economic integration with the core as measured by commuting ties.*

Metropolitan and Micropolitan Statistical Areas are defined in terms of whole counties.

If specified criteria are met, adjacent Metropolitan and Micropolitan Statistical Areas, in various combinations, may become the components of a set of complementary areas called Combined Statistical Areas.

<sup>1</sup>This column adds to the state total population without any duplication of counts.

<sup>2</sup>Columns 2 and 3 include persons who selected two or more races from categories 1 through 6. For example, a person who selected both "White" and "Black or African American" is counted once in each category. As such, a tally of responses in Columns 2 and 3 will exceed the state total population.
