

Building Bridges (A Partner of the Washington Service Corps)

Building Bridges was established by the 2007 Washington State Legislature (HB 1573) - a grant program for partnerships of schools, families, and communities to build a comprehensive dropout prevention, intervention and retrieval system. The Washington Service Corps (WSC) continues to partner with partner sites by dedicating AmeriCorps members to this important initiative. Targeted student populations include youth in foster care, the juvenile justice system, special education, and youth who have dropped out of school.

Counties Served: Snohomish
Yakima

Number of Members: 5 AmeriCorps Members
