

CLEARCorps of Washington

In conjunction with the American Lung Association of Washington's Master Home Environmentalist[®] Program, CLEARCorps of Washington recruits and trains its members to conduct in-home air quality assessments which utilize the Home Environmental Assessment List[®] (HEAL[®]). HEAL guides members through the process of identifying issues such as asthma and allergy triggers, lead, asbestos, mold, etc., that are specific to the resident's home then the recommend low-cost and no-cost solutions to identified problems. Members are intimately involved in all aspects of the Master Home Environmentalist[®] Program, training volunteers in indoor air quality issues, performing home assessments, entering resident's information into the database, tracking volunteer activities and hours, answering environmental health questions from the public, updating fact sheets, attending health fairs and making presentations. CLEARCorps of Washington serves any and all individuals and communities with a focus on those most susceptible to environmental health risks. Members serve at the American Lung Association of Washington's Seattle, Spokane and Yakima offices.
