

September 14, 2020

Mr. Darrell Jennings Office of Financial Management 300 Insurance Building P.O. Box 43113 Olympia, WA 98504-3113

#### SUBJECT: UW 2021-2023 Capital Budget Request Submittal

Dear Mr. Jennings,

The University of Washington is pleased to submit our 2021-2023 Capital Budget Request.

Per direction from the Office of Financial Management, we are providing a PDF version of the Request to <u>ofm.budget@ofm.wa.gov</u>, as well as submitting electronically through the Capital Budgeting System.

The UW's Capital Budget Request is the result of detailed planning efforts carefully integrated with the UW's key strategies to meet the challenges of the future. The process is mission-driven, requires an objective search for needs that support key strategies, focuses heavily on efficient utilization of existing resources, and proposes accelerated care for those facilities and infrastructures in need of the most attention. The projects identified in our request, and in the 10 Year Capital Plan, are necessary to sustain the mission of the University of Washington on the Bothell, Seattle and Tacoma campuses.

I would like to thank you for your support throughout the budget development process.

Please let us know if you have any questions regarding this submittal, or need any additional information.

Respectfully submitted,

John R. Wetzel

Portfolio Manager Capital Planning & Portfolio Management UW Facilities

Cc (via e-mail): Joe Dacca, UW State Relations Jed Bradley, UW Office of Planning & Budgeting Lou Cariello, VP of Facilities Barbara Wingerson, AVP of Facilities Finance Michael McCormick, AVP of Asset Management Kristine Kenney, Director of Capital Architecture + Planning FACILITIES UNIVERSITY of WASHINGTON

# TAB A Introduction

UW Capital Budget Introduction UW 2021-2023 State Capital Budget Request and 10 Year Plan 10 Year Capital Plan by Priority – Report (CBS 001) Department of Archaeology and Historic Preservation Review Correspondence Capital FTE Summary – Report (CBS 004) UW Deferred Maintenance Backlog Reduction Plan

#### University of Washington Capital Budget Introduction

As the state's flagship university, the University of Washington (UW) serves more students than any institution in the Northwest – 59,000 annually. Founded in 1861, the UW is one of the oldest statesupported institutions of higher education on the West Coast. The UW is deeply committed to upholding the responsibility that comes with that legacy; being public has always meant being accessible. Anyone can enjoy and be enriched by all the UW has to offer, including world-class libraries, art, music, drama, sports and the highest quality medical care in the Washington State. Being public also means being engaged with our communities, and through knowledge and discovery we are elevating the quality of lives of others.

The UW Seattle campus is made up of 18 colleges and schools whose faculty offer educational opportunities to students ranging from first-year undergraduates through doctoral-level candidates. While serving the educational needs of students locally, its reach is worldwide.

- Embracing Diversity: At the University of Washington, diversity is integral to excellence. UW students gain an understanding of diverse experiences and perspectives as well as justice issues around the globe becoming respectful and educated citizens of the world.
- Environmental Leadership: As one of the greenest regions in the country, the University of Washington also leads in environmental sustainability.
- Advancing Our World: By educating the next generation of thinkers and doers and leveraging faculty and researcher expertise, the University of Washington drives new ideas and innovations that make the world a better place.
- Creating Healthier Lives: The University of Washington is committed to new discoveries in human health and improving the lives and well-being of people here and around the world.

With their rapidly growing and diverse undergraduate and graduate programs, the Bothell and Tacoma campuses offer access to higher education and employment programs uniquely tailored to the needs of its students.

UW Bothell, founded in 1990, enjoys a 128-acre campus with more than 5,900 students enrolled in undergraduate and graduate degree programs. UW Bothell is unique as it is the only 4-year institution in WA which shares a campus with a two-year institution, Cascadia College. UW Bothell holds the student-faculty relationship to be paramount, providing access to excellence in higher education through innovative and creative curricula, interdisciplinary teaching and research, and a dynamic community of multicultural learning.

UW Tacoma, also founded in 1990, has approximately 5,300 students in 13 schools with over 50 degree programs. The school's 46-acre downtown campus, crafted from updated and restored historic buildings in the Warehouse District, has won national recognition. UW Tacoma is an urbanserving university providing access to students in a way that transforms families and communities, and impacts and informs economic development through community engagement.

#### **UW Vision Statement**

The UW educates a diverse student body to become responsible global citizens and future leaders though a challenging learning environment informed by cutting-edge scholarship. Discovery is at the heart of our University. We discover timely solutions to the world's most complex problems and enrich people's lives throughout our community, the state of Washington, the nation, and the world.

The primary mission of the UW is the preservation, advancement, and dissemination of knowledge. The University preserves knowledge through its libraries and collections, its courses, and the scholarship of its faculty. It advances new knowledge through many forms of research inquiry, and discussion, and disseminates it through the classroom and the laboratory, scholarly exchanges, creative practice, international education, and public service.

#### UW Key Strategies to Meet the Great Challenges of Our Future

- Attract a diverse and excellent student body and provide a rich learning experience
- Draw and retain outstanding faculty and staff to enhance educational quality, research, strength, and prominent leadership
- Strengthen interdisciplinary research and scholarship to benefit society and stimulate economic development
- Expand the global reach and impact of the UW
- Maintain and build infrastructure and facilities that insure the highest level of integrity, compliance and stewardship of our resources

#### 2021-2023 Biennial Capital Budget Request

The UW's 10 Year Capital Plan represents the University's stewardship of our existing facilities and space resources, as well as new investments required to maintain our stature as a major public resource for our region, nation, and world.

The UW's Capital Budget Request is the result of several physical planning efforts carefully integrated with the UW's key strategies to meet the challenges of the future. The process is missiondriven, requires an objective search for needs that support key strategies, focuses heavily on efficient utilization of existing resources, and proposes accelerated care for those facilities and infrastructures in need of the most attention.

The projects identified in the University of Washington 2021-2023 State Capital Budget Request, and in the 10 Year Capital Plan, are necessary to sustain the mission of the University of Washington on the Bothell, Seattle and Tacoma campuses.

# 2021-2023 State Capital Budget Request and 10 Year Plan

These projects accommodate projected growth and address the most pressing infrastructure needs. A variety of fund sources will be utilized to accomplish these. The following table lists projects that have been identified as needing at The UW has identified a series of capital projects, acquisitions, and leases to pursue over the next five years. These capital expenses are intended to further the strategic initiatives outlined by President Cauce and Provost Richards. least partial State funding to proceed.

#### Subject: Executive Order 05-05 Review in Support of State Budget Request

In accordance with Executive Order 05-05 directing agencies to consult with the Department of Archaeology and Historic Preservation (DAHP) on all capital construction projects to be considered for state funding or for pre-design reports, the University of Washington is hereby seeking exemptions for and providing information on six (6) proposed projects.

We would appreciate a letter from you confirming receipt of this information for OFM purposes.

The six projects include:

**INTERDISCIPLINARY ENGINEERING BUILDING** (2018-09-07191; also listed as "College of Engineering" in the past; DAHP letter dated 9/12/18 for pre-design). – The UW has completed the pre-design and requests funds for the construction of this facility to support the needs of a growing College of Engineering program and enrollment. This project site proposed is located at the existing University Facilities Building, University Facilities Administration Building, and Facilities Annex 4.

**MILGARD HALL** (2018-09-07191; previously called "UW Tacoma – Academic Innovation Building"; DAHP letter dated 10/18/18 for design). – The UW is requesting construction funding for the new UW Tacoma (UWT) Academic Innovation building, called Milgard Hall. The new 50,000 GSF building is expected to enable the institution to serve an additional 500 FTE state-supported students. It will also enable the use of cross laminated timber (CLT) in a major state funded construction project. The project site proposed is located in a parking lot just south of the UW Tacoma Snoqualmie building along South "C" St.

**RENOVATION/REPLACEMENT MAGNUSON HEALTH SCIENCES BUILDING - Phase 2 (T-Wing)** – The UW is seeking design funding for Phase 2 of the T-Wing Renovation/Replacement at the Magnuson Health Sciences Center. The pre-design for Phase 2 has been completed. (Phase I is the Health Sciences Education Building currently under construction; 2018-09-07191; DAHP letter dated 10/18/18.)

**ANDERSON HALL** (2020-05-03624; reviewed by DAHP letter dated 5/28/20 for pre-design) – The UW requests design funding for Anderson Hall, a part of the UW's original Restore the Core program to restore some of our oldest buildings on campus. Typical work includes items such as exterior cleaning and unreinforced masonry improvements (i.e. bracing building appendages, stabilizing non-bearing walls at building entrances and outdoor areas of congregation); interior system upgrades such as lighting, IT, and mechanical; fire, life, safety upgrades; removal of some past renovation elements; and improved accessibility per the ADA.

**BEHAVIORAL HEALTH TEACHING FACILITY** (2020-02-01350; reviewed by DAHP letter dated 2/18/20 for pre-design/pre-construction) – The Washington State legislature appropriated funding (House Bill 1593) for predesign, siting, and design of a facility to provide innovative and integrated behavioral health care and teaching services. Pre-design and pre-construction were funded in the last biennium to expedite the delivery of this building. The UW is seeking construction funding. The project is at the UW Medical Center – Northwest (formerly Northwest Hospital) on the current D-Wing Building site. A SEPA EIS Addendum is soon to be published with historic resource review of the D-Wing building included.

**SEISMIC IMPROVEMENTS** – (2018-09-07191; also called URM Improvements and UW Major Infrastructure in the past; DAHP letter dated 9/12/18). – The UW requests funds for phase 3 of seismic improvements to upgrade unreinforced masonry (URM) buildings on the Seattle campus. Sixteen buildings have been identified that require URM/façade upgrades. The UW has a number of buildings constructed with URM from the late 19<sup>th</sup> century to the mid-20<sup>th</sup> century. Twenty-five buildings have been identified that require parapet bracing. UW has identified the work needed to: improve life safety; minimize structural failure; preserve historic structures; and reduce adverse effects on UW operations in the event of an earthquake. The work of this capital program is being planned for four-five phases, depending on funding. Significant coordination with the Seattle Department of Construction & Inspections structural engineering group and Seattle Department of Neighborhoods Landmarks group has occurred during the planning of this work, including design review.

Allyson Brooks Ph.D., Director State Historic Preservation Officer

September 9, 2020

Ms. Julie Blakeslee Land Use Planner University of Washington Box 352205 Seattle, WA 98195

In future correspondence please refer to: Project Tracking Code: 2020-09-05684 Re: University of Washington 2021-2023 Biennium Budget Request

Dear Ms. Blakeslee:

Thank you for contacting the Washington State Department of Archaeology and Historic Preservation (DAHP). The above referenced project has been reviewed on behalf of the State Historic Preservation Officer (SHPO) under provisions of Governor's Executive Order 05-05 (GEO 05-05). We have reviewed the materials you provided for the University of Washington Capital Programs Projects for the 2021-2023 Biennium.

We look forward to continuing consultation under Governor's Executive Order 05-05 on the following projects:

INTERDISCIPLINARY ENGINEERING BUILDING (2018-09-07191) MILGARD HALL (2018-09-07191) RENOVATION/REPLACEMENT MAGNUSON HEALTH SCIENCES BUILDING – (2018-09-07191) ANDERSON HALL (2020-05-03624) BEHAVIORAL HEALTH TEACHING FACILITY (2020-02-01350) SEISMIC IMPROVEMENTS – (2018-09-07191)

Finally, please note that in order to streamline our responses, DAHP requires that Resource documentation (HPI, Archaeology sites, TCP) and reports be submitted electronically. Correspondence must be emailed in PDF format to the appropriate compliance email address. For more information about how to submit documents to DAHP please visit: https://dahp.wa.gov/project-review. To assist you in conducting a cultural resource survey and inventory effort, DAHP has developed Guidelines for Cultural Resources Reporting. You can view or download a copy from our website.

Thank you for the opportunity to review and comment. Please ensure that the DAHP Project Number (a.k.a. Project Tracking Code) is shared with any hired cultural resource consultants and is attached to any communications or submitted reports. If you have any questions, please feel free to contact me.

Sincerely,

Holly Borth

Project Compliance Reviewer (360) 890-0174 holly.borth@dahp.wa.gov

#### University of Washington Deferred Maintenance Backlog Reduction Plan

The University of Washington's Deferred Maintenance Backlog Reduction Plan is prepared and presented in the 2021-23 Capital Budget Request to meet the requirements of RCW 43.88.030 (5d): "A strategic plan for reducing backlogs of maintenance and repair projects. The plan shall include a prioritized list of specific facility deficiencies and capital projects to address the deficiencies for each agency, cost estimates for each project, a schedule for completing projects over a reasonable period of time, and identification of normal maintenance activities to reduce future backlogs;"

#### INTRODUCTION

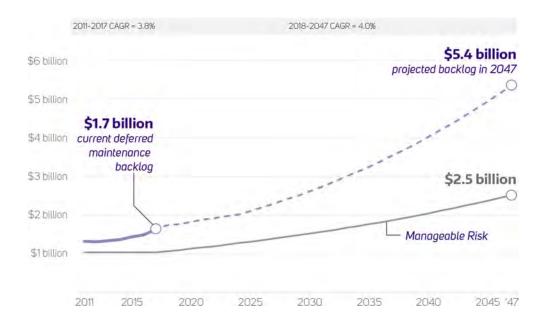

The University of Washington's deferred maintenance backlog reduction plan has been fully incorporated into the long-term (30 year) capital planning framework presented the Board of Regents earlier this year. The plan relies on a four pronged approach:

- 1. Increasing annual capital spending on renewal or replacement to 50% of total expenditures
- 2. Limit the growth of state supported space to 0.5% per year
- 3. Fully fund annual M&O for all new buildings
- 4. Increase preventive maintenance

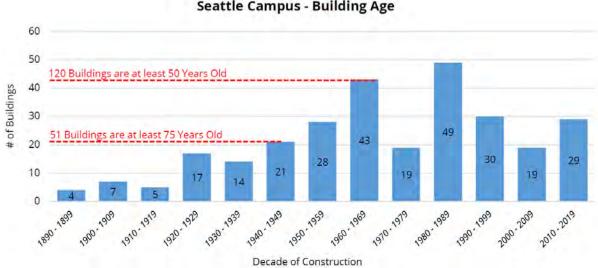

Through sustained adherence to these strategies, the University will be able to reduce its deferred maintenance backlog to a manageable level in the next 20-30 years. This will improve the quality of the campus, reduce the risk of catastrophic failures, extend the life of the buildings, enhance health and safety, contribute to meeting sustainability goals, and increase the academic quality through the modernization of deteriorating facilities.

#### BACKGROUND

Based on information compiled from our building condition assessments and those of an outside consultant (Sightlines), we estimate the current deferred maintenance backlog for the state-supported buildings on the Seattle campus is \$1.7 billion and growing. This translates into roughly \$135 per square foot, which is significantly higher than the \$80 per square foot generally considered to be manageable for institutions of higher education. As a result, the University is forced to spend most of its available resources on corrective maintenance and emergency replacement as building components fail. This is inherently less efficient than addressing maintenance issues in a planned fashion and results in accelerated deterioration of our most important buildings. The figure below illustrates how this backlog can accelerate with continued underinvestment and inflation, if we don't begin to address it now.

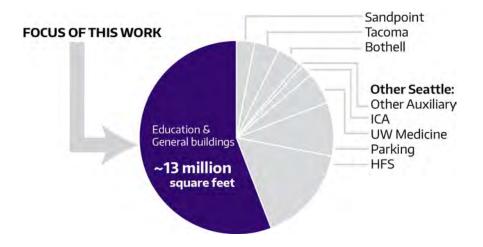

On the Seattle campus, this phenomenon is exasperated because of the age profile of our buildings. Nearly 50% of our buildings are more than 50 years old and another 25% are approaching 30 years old. Normal life expectancy for most major building systems is approximately 30 years, so we are experiencing a "bow wave" of buildings and systems nearing the end of their useful life.

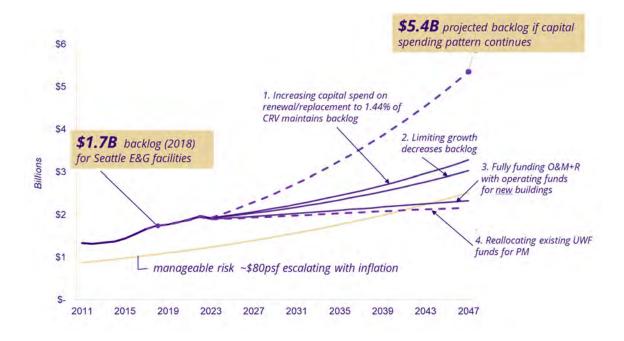

Seattle Campus - Building Age

Although the University of Washington owns over 27 million square feet across the city and state, the focus of our deferred maintenance backlog reduction plan is on the approximately 13 million square feet of state-supported (education and general) facilities on the Seattle campus. These facilities are critical to the core mission of our institution and a targeted approach is needed to keep these buildings as functional as possible.

#### STRATEGY

A four pronged strategy was endorsed by the Board of Regents in March 2019, and it is intended to be a realistic and sustainable model that will allow the University to slow the growth of deferred maintenance and gradually reduce the backlog to a manageable level. The figure below illustrates the long-term impact of each of the measures.

The four strategies illustrated in the above diagram include:

1. Increase annual capital spending on renewal or replacement to 50% of total expenditures. Historically the University has focused significantly less of its total capital expenditures on renewal and replacement projects. Instead much of the capital has been used for new buildings which actually increase the need for annual renewal and replacement. This shift will allow the University to reinvest capital in existing facilities at roughly the same rate as they are deteriorating - calculated at 1.44% of the current replacement value – and at the same time reduce the rate at which we are adding to the need. While the 2021-2023 Capital Budget Request includes funding for two new buildings already in process, future capital requests will be focused on the renovation of existing buildings.

- 2. Limit the growth of state supported space to 0.5% per year. Historically, the University has grown its square footage at a rate of 3% per year. As stated above, this increases the need for annual reinvestment and eventually adds to the deferred maintenance backlog. By focusing sharply on improved space utilization, the University can reduce the growth rate of state supported space over the next decade and slow down the growth of its reinvestment needs. Again, the 2021-2023 Capital Budget Request includes two requests for growth projects, but future requests will be focused on renovation of existing buildings.
- 3. **Fully fund annual M&O for new buildings.** When new buildings are added to the campus, maintenance and operating costs increase. However, full funding for these costs is often not provided. In the end, this represents a reduction in funding available for maintenance on a square foot basis, which inevitably results in increased deferred maintenance. The University will now require that appropriate M&O funding to be committed before beginning any new building project.
- 4. **Increase preventive maintenance.** Good preventive maintenance can extend the useful life of building components, which has the effect of slowing the need to replace building components such as air handling units, pumps, fans, etc. As a result, this will slow the growth of the deferred maintenance backlog.

#### **ACTION STEPS:**

The cornerstone of the deferred maintenance backlog reduction plan is access and use of reliable and fully integrated information about our facilities. A number of initiatives are underway to improve the data and the University's use of it to make decisions:

- Transition to Operations (T2O). The University has been an industry leader with regard to transitioning newly constructed buildings to operations and occupancy. Strict data standards and performance guidelines are set for each building component, and preventive maintenance cycles are integrated into the University's systems. This powers our corresponding preventive maintenance efforts in new facilities, which is our focus. Doing effective preventive maintenance on these new assets will allow us to extend the useful life of the building components from the very beginning.
- **Comprehensive Facilities Condition Assessment**. While the University maintains an overall assessment of facilities conditions, it does not have detailed assessments at the component level. The University has contracted with a consultant (ISES Corporation) to develop a detailed assessment of every facility. This work will extend through the next biennium, and the information will be captured and integrated into our facilities management software (AssetWorks) to guide preventive maintenance plans and work order management.
- Monitor Based Commissioning. The University implemented a first phase of "smart meters" utilizing a federal grant several years ago, and it is now poised to expand this program more broadly across the campus. By monitoring these meters, it is possible to identify systems that are not performing at an optimal level before it becomes apparent to occupants and technicians. This allows us to establish a *predictive* maintenance practice, which is an even more efficient way to service our buildings, freeing up resources to address components

nearing the end of their useful life. This also provides real time information about performance and utility usage, which informs decisions about energy conservation and minor works projects.

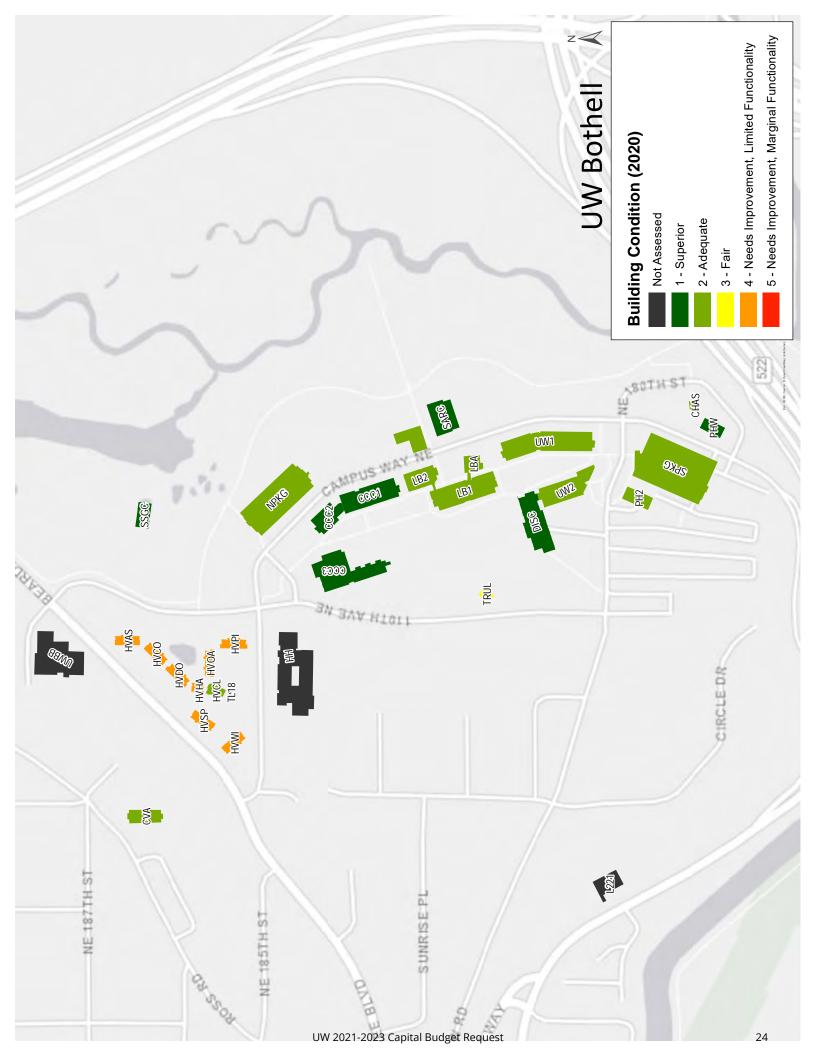

• **Portfolio Dashboards.** The University is developing real time portfolio dashboards that allow us to assess priorities against up to date information about the condition, performance, and productivity of each building, maximizing the value of our investments.

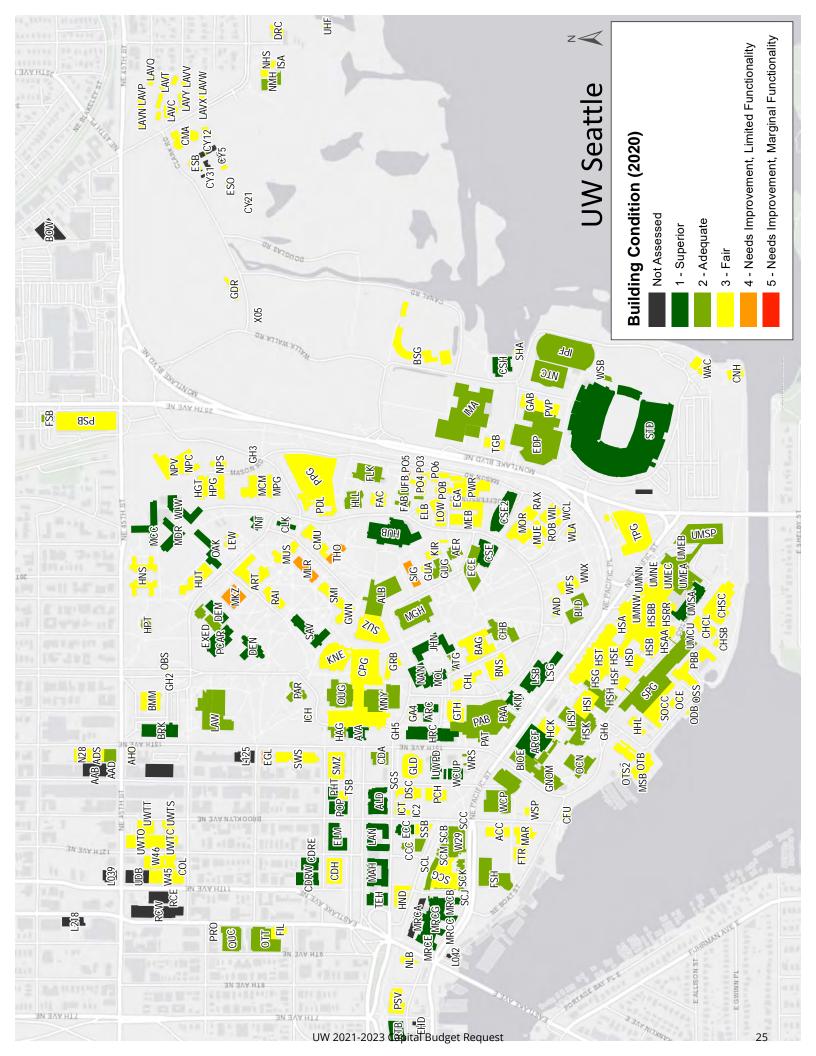

#### **PROJECT IDENTIFICATION**

Within the overall strategy, all individual capital investments will continue to be evaluated based on multiple criteria in order to optimize the effectiveness of the investments. This set of criteria was developed by the University's Board of Deans and Chancellors in support of the University's mission, and we use it to evaluate all projects – large and small.

- 1. Increasing classroom capacity and capabilities
- 2. Increasing programmatic capacity to accommodate highest needs
- 3. Improving interdisciplinary capacity and accessibility
- 4. Mitigation of risks, including accreditation, regulatory action, legal mandates, etc.
- 5. Increasing research capacity to accommodate highest needs
- 6. Improving core infrastructure
- 7. Reducing deferred maintenance backlog
- 8. Improving space optimization

The UW's 2021-2023 Capital Budget Request prioritizes investment in projects that will help stem the trend of deferred maintenance and support continued preservation of the public's assets which directly support the UW's educational mission. Our request for State Bond funds (major capital) and appropriated UW Building Account support for Asset Preservation (\$42.7M), Preventive Facility Maintenance (\$25.8M), and Seismic Improvements (\$18M) in the next biennium will support preservation and renewal projects in our building and infrastructure systems. We believe this investment provides the public with the biggest return for each public dollar committed.

- 20091001 Miller Hall Renovation

#### **UW PRESERVATION PROJECTS**

#### **Request Summaries**

#### Preventative Facility Maintenance and Building System Repairs - \$25.825M for M&O

This is an automatic biennial funding transfer of \$25.825M from the University of Washington's 064 Building Account to support Maintenance and Operations on the Seattle Campus.

#### Major Infrastructure (Seismic Improvements) - \$18M for Construction

The University of Washington requests \$18M in the 21-23 biennium for Phase 3 of our ongoing, multi-phase Major Infrastructure (Seismic Improvements) project.

This ongoing project improves seismic preparedness in unreinforced masonry (URM) buildings on the Seattle campus. Twenty-five buildings were identified to be repaired over an eight-year timeframe. Phase 1 has been completed and we are midway through Phase 2. The work reinforces URM bearing and non-bearing walls and reinforces parapets to reduce the risk of collapse of buildings and masonry falling from buildings.

#### Magnuson Health Sciences Phase II - Renovation/Replacement - \$5M for Design

The University of Washington requests \$5M of funding in the 21-23 biennium for the design phase of the Magnuson Health Sciences Phase II - Renovation/Replacement. This funding will continue to support the ongoing, phased renovation of the Magnuson Health Sciences Center (MHSC). Funding for construction will be requested in the 23-25 biennium.

Enabled by the Phase I construction of the new Health Sciences Education Building, this project represents Phase II of the long-range, multi-phase renovation of approximately 400,000 square feet of existing space in the health sciences complex. Phase II is essential for creating more efficient and higher space utilization. To be competitive, our Health Science education is dependent upon creating space that encourages formal and informal interaction among students, faculty, and staff and fosters our vision of the future for all six Health Sciences schools: Dentistry, Medicine, Nursing, Pharmacy, Public Health, and Social Work.

#### Anderson Hall Renovation – \$3M for Design

The University of Washington requests \$3M of funding in the 21-23 biennium for the design phase of the Anderson Hall Renovation. Funding for construction will be requested in the 23-25 biennium. The College of the Environment will be contributing one third (\$9M) of the proposed overall project funding.

While this building represents more than a century of the University's contributions to the State's environmental, societal, and economic well-being, it no longer adequately promotes the health, safety, or welfare of its occupants, falling short of current standards related to occupant comfort, air quality, fire and life safety systems, and accessibility. The proposed renovation is an opportunity to preserve the buildings legacy, prioritize collaborative spaces, enhances technological facilities, address long-standing accessibility and safety issues, and modernize building systems.

#### UW Seattle - Asset Preservation (Minor Works) 21-23 - \$23.2M for Construction

The University of Washington requests \$23.2M in the 21-23 biennium to fund Minor Works (projects valued at \$2M or less) on the Seattle Campus. Once the capital budget is enacted, the final Minor Works project lists will be provided to OFM for review and approval, and to the House Capital Budget and Senate Ways and Means committees for review and comment.

Miscellaneous repair and renewal projects for the Seattle Campus such as (but not limited to): code and safety projects, electrical, exteriors, infrastructure, interiors, mechanical, site work and utilities. These projects support ongoing campus preservation and renewal efforts to provide the facilities required to meet the needs of increasing student enrollment, programs and an enhanced student experience.

#### UW Seattle - Asset Preservation 21-23 - \$12.5M for Construction

The University of Washington requests \$12.5M in the 21-23 biennium to fund Asset Preservation projects on the Seattle Campus.

Asset Preservation projects maintain, preserve and extend the life of existing facilities and assets and do not significantly change the facility to address current or anticipated program changes. Examples include renovating building systems, envelope fixes, upgrading utility systems and making other significant repairs. These projects do not fit the definition of Minor Works, but are typically not large enough to be stand-alone Major Project requests.

#### UW Bothell - Asset Preservation (Minor Works) 21-23 - \$3.6M for Construction

The University of Washington requests \$3.6M in the 21-23 biennium to fund Minor Works (projects valued at \$2M or less) on the Bothell Campus. Once the capital budget is enacted, the final Minor Works project lists will be provided to OFM for review and approval, and to the House Capital Budget and Senate Ways and Means committees for review and comment.

Miscellaneous repair and renewal projects for the Bothell Campus such as (but not limited to): code and safety projects, electrical, exteriors, infrastructure, interiors, mechanical, site work and utilities. These projects support ongoing campus preservation and renewal efforts to provide the facilities required to meet the needs of increasing student enrollment, programs and an enhanced student experience.

#### UW Tacoma - Asset Preservation (Minor Works) 21-23 - \$2.7M for Construction

The University of Washington requests \$2.7M in the 21-23 biennium to fund Minor Works (projects valued at \$2M or less) on the Tacoma Campus. Once the capital budget is enacted, the final Minor Works project lists will be provided to OFM for review and approval, and to the House Capital Budget and Senate Ways and Means committees for review and comment.

Miscellaneous repair and renewal projects for the Tacoma Campus such as (but not limited to): code and safety projects, electrical, exteriors, infrastructure, interiors, mechanical, site work and utilities. These projects support ongoing campus preservation and renewal efforts to provide the facilities required to meet the needs of increasing student enrollment, programs and an enhanced student experience.

#### UW Tacoma Campus Soil Remediation - \$2M (State Toxics Account)

The University of Washington requests \$2M in the 21-23 biennium to fund the ongoing soil remediation efforts at the UW Tacoma Campus.

This request will provide funding to continue the ongoing Remedial Investigation and prepare the summary report (draft due December 2021). These regulatory requirements are stipulated in Agreed Order DE 11081, which is enforced by the Washing State Department of Ecology. It will also cover other costs associated with the legacy contamination across campus including but not limited to assessments of sites being considered for purchase. The UW anticipates the need to continue the purchase of individual real estate parcels and buildings to enable the Tacoma campus to accommodate future enrollment growth in accordance with the legislatively mandated expansion.

#### **T-Wing Renovation - Phase 3 - FUTURE REQUEST**

Third phase of the multi-phased renovation of the fully occupied Magnuson Health Sciences T-Wing to address deferred maintenance and new pedagogies. The Phase II Predesign will layout the approximate phasing, needs to be addressed and the complexities of a project of this magnitude.

#### Bagley Hall - Renovation/Replacement (A&S) - Phase 1 - FUTURE REQUEST

This phased project would develop a renovated/replacement Bagley Hall as a Chemical Sciences and Engineering Building (CSB) that would enable a new mode of science where curiosity-driven chemical research can transform into real-world applications in real-time. The top R1 Chemistry and Chemical Engineering departments in the world have tightly integrated research and teaching programs where new discoveries in basic chemical sciences translate into real-world solutions via engineering applications. The UW has two world-class departments of Chemistry and Chemical Engineering with vibrant research programs in basic and applied chemical sciences and engineering. Despite the broad overlap of common areas of excellence in research and pedagogy, the departments have yet to capitalize on their synergies. These departments are currently housed in physically separated, aging, and high-risk facilities (Bagley Hall and Benson Hall), which lack available and appropriate space needed to build on areas of common interests and develop bold new research and education initiatives.

#### Miller Hall Renovation – FUTURE REQUEST

Miller Hall was originally built in 1922 and was partially renovated in 1962. Miller Hall was one of the 15 buildings identified for renovation in the 2004 "Restore the Core" program. As one of the buildings on the UW's Critical Building List, this building is an integral part of the campus framework. Today, all the building systems in Miller Hall are long past their useful life and require comprehensive replacement with code-compliant energy conserving, structural (seismic strengthening) mechanical, electrical, plumbing, and fire/life safety systems. Restoration of this historic building to arrest further decline and sustain its cultural and architectural character is planned. Miller Hall currently houses the College of Education and serves as a staple classroom facility for UW undergraduate and professional studies.

Report Number: CBS002 Date Run: 9/14/2020 7:04AM

Project Number:	30000808
Project Title:	UW Major Infrastructure
Project Class:	Preservation

### Description

Starting Fiscal Year: 2018 Agency Priority: 2

#### **Project Summary**

The University of Washington requests \$18M in the 21-23 biennium for Phase 3 of our ongoing, multi-phase Seismic Improvements project to upgrade unreinforced masonry (URM) buildings on the Seattle Campus.

#### Project Description

Identify the Problem: The University of Washington has identified sixteen buildings that require seismic related upgrades. These buildings were constructed at the turn of the 20th century utilizing unreinforced masonry or isolated framing supported by URM walls. The typical methods of anchorage used during this era of construction are not sufficient to resist seismic forces. During an earthquake, it is possible for the anchorage to be compromised, resulting in a partial collapse of the façade. In a severe earthquake, the collapse of the façade or structural failure could occur. In either case, there is a high probability of damage to buildings.

<u>What will the request Produce:</u> These seismic improvements are intended to address life safety and building structural issues to reduce potential adverse impacts on students, faculty, staff and university operations. The work of this project will reinforce URM bearing and non-bearing walls, and reinforce parapets to reduce the risk of severe damage to buildings and minimize masonry falling from buildings.

<u>How would the request address the Problem:</u> In 2016, the UW commissioned a study to evaluate URM wall buildings and assess buildings with brick and terracotta facades to determine the need and estimated cost for seismic upgrades. The URM buildings addressed in the study are (Name, Construction date): Eagleson Hall, 1922; Lewis hall, 1896; Hutchinson Hall, 1926: Art Building, 1949; Music Building, 1948; Plant Operations, 1929; Theodor Jacobsen Observatory, 1894; Anderson Hall, 1924; Gowan Hall, 1932; Harris Hydraulics, 1920; Miller Hall, 1922; Raitt Hall, 1915; and Smith Hall, 1938. The first phase of this project of URM improvements will include Eagleson Hall, Lewis Hall, Hutchinson Hall, and the Theodor Jacobson Observatory.

Which Clientele would be impacted: The collapse or structural damage resulting from the unreinforced masonry(URM) buildings could result in significant danger or injury to students, faculty, staff, or public. Damaged buildings may result in the closure or suspension of operations affecting teaching and research.

<u>Describe how this project supports the agency:</u> The funding for this project will enable the UW to commence the design, phasing and scheduling of seismic improvements to the buildings. This project will be carried out over three phases. This will ensure adequate time and minimal impact on the academic and research operations of the UW. Phase I will address the buildings that require the most extensive work and urgency. Phase 2 and Phase 3 will address the remaining buildings identified to require URM/facade/parapet seismic related upgrades.

### Description

#### **Growth Management impacts**

Under the provisions of the University of Washington campus master plan, the UW prepares a Historic Resource Addendum (HRA) for any project that makes exterior alterations to a building that is at least 50 years old. The information and analysis in the HRA provides a framework and context to ensure that important elements of the campus, its historical character, environmental considerations, and landscape context are preserved, enhanced and valued. The HRA further ensures that improvements, changes, and modifications to the physical environment may be clearly analyzed and documented. All buildings in this project are more than 50 years old and will require an HRA as part of the process to complete the work. The HRA will be an attachment to project documentations and be considered by appropriate decision makers.

Report Number: CBS002 Date Run: 9/14/2020 7:04AM

Project Number:40000049Project Title:Magnuson Health Sciences Phase II- Renovation/ReplacementProject Class:Preservation

### Description

Starting Fiscal Year: 2022 Agency Priority: 3

#### **Project Summary**

The University of Washington requests \$5M of funding in the 21-23 biennium for the design of the Magnuson Health Sciences Phase II - Renovation/Replacement. This funding will continue to support the ongoing, phased renovation of the Magnuson Health Sciences Center (MHSC). Funding for construction will be requested in the 23-25 biennium. This multi-phased renovation within the Health Sciences campus will significantly reduce our deferred maintenance in infrastructure, life safety, code compliance issues, as well as enable modernization of classroom and lab spaces (some instructional spaces are currently at risk of losing accreditation).

#### Project Description

#### Overview

Enabled by the Phase I construction of the new Health Sciences Education Building, this project represents Phase II of the long-range, multi-phase renovation of approximately 400,000 square feet of existing space in the health science complex. Phase II is essential for creating more efficient and higher space utilization. To be competitive, our Health Science education is dependent upon creating space that encourages formal and informal interaction among students, faculty, and staff and fosters our vision of the future for all six Health Sciences schools: Dentistry, Medicine, Nursing, Pharmacy, Public Health, and Social Work.

#### **Cutting Edge E-Learning Capacity**

The design will support and enhance in-person experiential learning capacity for students throughout the state as Health Sciences students are embracing technology in ways not imagined a few years ago as a key component of their Health Sciences professional education.

The design will support distance and distributed learning by enhancing technology platforms including I-TECH and others to support simplified access to our learning and teaching opportunities through the state, across the country and around the world.

#### **Geographic Reach**

UW health professions have increasingly broad and enhanced geographic reach and influence through: Landmark WWAMI (Washington, Wyoming, Alaska, Montana, and Idaho) medical education program; RIDE (Regional Initiatives in Dental Education) program; MEDEX a leading national Health Sciences education program in Physician Assistant education; and other regional public health professions education initiatives throughout the region and state.

#### Improved Connectivity

The design will improve connectivity within the larger Magnuson Health Science Center, the existing campus distance learning locations, and other educational programs physically remote from the Magnuson Health Science T-Wing classrooms and simulation facilities.

Location

City: Seattle

County: King

Legislative District: 043

Project Title:	Magnuson Health Sciences Phase II- Renovation/Replacement
Project Class:	Preservation

#### Description

#### **Growth Management impacts**

The 2019 Campus Master Plan (CMP) is the primary regulatory vehicle for the University's future development, defining both the square footage to be constructed and the geographic location of such development. The CMP applies to the Seattle campus and the University's property located within the Major Institution Overlay, or MIO, and is guided by the City-University Agreement between the University of Washington and the City of Seattle.

Report Number: CBS002 Date Run: 9/14/2020 7:04AM

Project Number:	20091002
Project Title:	Anderson Hall Renovation
Project Class:	Preservation

### Description

Starting Fiscal Year: 2022 Agency Priority: 4

#### **Project Summary**

The University of Washington requests \$3M of funding in the 21-23 biennium for the design phase of the Anderson Hall Renovation. Funding for construction will be requested in the 23-25 biennium. The College of the Environment will be contributing one third (\$9M) of the proposed overall project funding.

#### **Project Description**

Anderson Hall is the central hub for an interdisciplinary community of more than 1,000 students, faculty, and staff from the University of Washington's School of Environmental and Forest Sciences. The School works together with state, federal, tribal, industry, and community partners to advance understanding of natural resources and train the next generation of leaders in supporting;

- · renewable resource use
- ecological restoration
- wildfire management
- wildlife conservation
- rural economic development
- climate adaptation and mitigation
- healthy urban ecosystems.

While this building represents more than a century of the University's contributions to the State's environmental, societal, and economic well-being, it no longer adequately promotes the health, safety, or welfare of its occupants, falling short of current standards related to occupant comfort, air quality, fire and life safety systems, and accessibility. The proposed renovation is an opportunity to preserve the buildings legacy, prioritize collaborative spaces, enhances technological facilities, address long-standing accessibility and safety issues, and modernize building systems.

City: Seattle

County: King

Legislative District: 043

#### **Project Type**

Remodel/Renovate/Modernize (Major Projects)

#### **Growth Management impacts**

The 2019 Campus Master Plan (CMP) is the primary regulatory vehicle for the University's future development, defining both the square footage to be constructed and the geographic location of such development. The CMP applies to the Seattle campus and the University's property located within the Major Institution Overlay, or MIO, and is guided by the City-University Agreement between the University of Washington and the City of Seattle.

Project Title:UW Seattle - Asset Preservation (Minor Works) 21-23Project Class:Preservation

### Description

Starting Fiscal Year: 2022 Agency Priority: 5

#### **Project Summary**

The University of Washington requests \$23.2M in the 21-23 biennium to fund Minor Works (projects valued at \$2M or less) on the Seattle Campus. Once the capital budget is enacted, the final Minor Works project lists will be provided to OFM for review and approval, and to the House Capital Budget and Senate Ways and Means committees for review and comment.

#### **Project Description**

Below are the typical types of projects that are executed in our Seattle Campus - Minor Works program.

#### Infrastructure and Utilities

Miscellaneous infrastructure and utility projects such as (but not limited to): cabling/switch replacement, chilled water distribution, circuit breakers, compressed air, cooling towers, electrical distribution, emergency systems, generators, information technology projects, natural gas lines, sewer systems, switch monitoring, site transformers, steam distribution, telecommunications, campus tunnel system, and water distribution.

#### **Building Repair and Renewal**

Miscellaneous building repair and renewal projects such as (but not limited to): Americans with Disabilities Act (ADA) compliance, cladding cleaning/repairs, exterior/interior doors, flooring, foundations, masonry, painting, roofing projects that do not typically rise to the level of a full replacement, seismic improvements (minor), space improvements/modifications, skylights, structural flooring, wall repair/painting, windows and wood refinishing.

#### **Electrical and Mechanical Systems**

Miscellaneous electrical and mechanical systems projects such as (but not limited to): air handling units, boilers, cabling, chillers, cooling towers, controls, critical systems, drains, drive replacements, fixtures, full/partial elevator/escalator/lift refurbishments, gas lines, heat pumps, hot water converters/tanks, lighting, metering, piping, resource conservation opportunities, software upgrades, supply fans, switchboards, switchgear, transformers, valves and variable frequency drives.

#### Site Work Repair and Renewal

Miscellaneous site work repair and renewal projects such as (but not limited to): asphalt/concrete paving and repairs, emergency site utilities, irrigation, landscaping, metering and controls, signage, stormwater management, and striping for both vehicular and pedestrian pathways.

#### Fire and Life Safety Improvements

Miscellaneous code and safety issue projects such as (but not limited to): access control systems, fire alarm/sprinkler systems, safe access, security, and slip/trip/fall hazards.

Version: 03 21-23 Capital Request FINAL

Report Number: CBS002 Date Run: 9/14/2020 7:06AM

Project Number: 40000074

Project Title: UW Seattle - Asset Preservation 21-23 Project Class: Preservation

### Description

Starting Fiscal Year: 2022 Agency Priority: 6

### **Project Summary**

The University of Washington requests \$12.5M in the 21-23 biennium to fund Asset Preservation projects on the Seattle Campus.

#### Project Description

Below are the typical types of projects that are executed in our Seattle Campus - Asset Preservation program. These projects do not fit the definition of Minor Works, but are not typically large enough to be stand alone Major Project requests.

#### Infrastructure and Utilities

Miscellaneous infrastructure and utility projects such as (but not limited to): cabling/switch replacement, chilled water distribution, cooling towers, electrical distribution, emergency systems, generators, information technology projects, natural gas lines, sewer systems, site transformers, steam distribution, telecommunications, campus tunnel system, and water distribution.

#### **Building Repair and Renewal**

Miscellaneous building repair and renewal projects such as (but not limited to): Americans with Disabilities Act (ADA) compliance, cladding cleaning/repairs, foundations, masonry, roofing projects, seismic improvements (minor), space improvements/modifications, skylights, structural flooring, and windows.

#### **Electrical and Mechanical Systems**

Miscellaneous electrical and mechanical systems projects such as (but not limited to): air handling units, boilers, cabling, chillers, cooling towers, controls, critical systems, full/partial elevator/escalator/lift refurbishments, gas lines, piping, resource conservation opportunities, software upgrades, supply fans, switchboards, switchgear, and transformers.

### Site Work Repair and Renewal

Miscellaneous site work repair and renewal projects such as (but not limited to): asphalt/concrete paving, controls, metering, site utilities, and stormwater management.

### Fire and Life Safety Improvements

Miscellaneous code and safety issue projects such as (but not limited to): access control systems, fire alarm/sprinkler systems, safe access, security, and slip/trip/fall hazards.

Location

City: Seattle

County: King

Legislative District: 043

### **Project Type**

Infrastructure (Major Projects) Remodel/Renovate/Modernize (Major Projects)

### Growth Management impacts

The 2019 Campus Master Plan (CMP) is the primary regulatory vehicle for the University's future development, defining both the square footage to be constructed and the geographic location of such development. The CMP applies to the Seattle campus and the University's property located within the Major Institution Overlay, or MIO, and is guided by the City-University Agreement between the University of Washington and the City of Seattle.

## 360 - University of Washington Capital Project Request

2021-23 Biennium

Version: 03 21-23 Capital Request FINAL

Report Number: CBS002 Date Run: 9/14/2020 7:06AM

Project Number: 40000070

Project Title:UW Bothell - Asset Preservation (Minor Works) 21-23Project Class:Preservation

### Description

Starting Fiscal Year: 2022 Agency Priority: 7

#### **Project Summary**

The University of Washington requests \$3.6M in the 21-23 biennium to fund Minor Works (projects valued at \$2M or less) on the Bothell Campus. Once the capital budget is enacted, the final Minor Works project lists will be provided to OFM for review and approval, and to the House Capital Budget and Senate Ways and Means committees for review and comment.

### **Project Description**

Miscellaneous repair and renewal projects for the Bothell Campus such as (but not limited to): code and safety projects, electrical, exteriors, infrastructure, interiors, mechanical, site work and utilities. These projects support ongoing campus preservation and renewal efforts to provide the facilities required to meet the needs of increasing student enrollment, programs and an enhanced student experience.

#### Location

City: Bothell

County: King

Legislative District: 001

### **Project Type**

Facility Preservation (Minor Works) Health, Safety and Code Requirements (Minor Works) Infrastructure Preservation (Minor Works)

#### **Growth Management impacts**

In June of 2016, the University of Washington Bothell and Cascadia College initiated a new Campus Master Plan (CMP). Developed in coordination and cooperation with the City of Bothell and the community, this CMP establishes a shared Long-term Vision for the campus, serving as the basis for future development and regulatory action.

Project Number: 40000072

Project Title:UW Tacoma - Asset Preservation (Minor Works) 21-23Project Class:Preservation

### Description

Starting Fiscal Year: 2022 Agency Priority: 8

#### **Project Summary**

The University of Washington requests \$2.7M in the 21-23 biennium to fund Minor Works (projects valued at \$2M or less) on the Tacoma Campus. Once the capital budget is enacted, the final Minor Works project lists will be provided to OFM for review and approval, and to the House Capital Budget and Senate Ways and Means committees for review and comment.

### **Project Description**

Miscellaneous repair and renewal projects for the Tacoma Campus such as (but not limited to): code and safety projects, electrical, exteriors, infrastructure, interiors, mechanical, site work and utilities. These projects support ongoing campus preservation and renewal efforts to provide the facilities required to meet the needs of increasing student enrollment, programs and an enhanced student experience.

### Location

City: Tacoma

County: Pierce

Legislative District: 027

### **Project Type**

Facility Preservation (Minor Works) Health, Safety and Code Requirements (Minor Works) Infrastructure Preservation (Minor Works)

### **Growth Management impacts**

The Growth Strategies legislation requires state agencies to comply with local land use regulations adopted pursuant to the Growth Management Act, which the University of Washington acknowledges through the development of the Tacoma Campus Master Plan which was approved by the Tacoma City Council and by the UW Board of Regents. The proposed project is consistent with the Tacoma Campus Master Plan which serves a general regulatory guide to UW campus land use development.

# 360 - University of Washington Capital Project Request

2021-23 Biennium

Version: 03 21-23 Capital Request FINAL

Report Number: CBS002 Date Run: 9/14/2020 7:08AM

### Project Number: 9200002

Project Title: UW Tacoma Campus Soil Remediation Project Class: Preservation

### Description

Starting Fiscal Year: 2013 Agency Priority: 9

### **Project Summary**

The University of Washington requests \$2M in the 21-23 biennium to fund the ongoing soil remediation efforts at the UW Tacoma Campus.

### Project Description

### **Proposed Project and Problem Driving the Request**

This request will provide funding to continue the ongoing Remedial Investigation and prepare the summary report (draft due December 2021). These regulatory requirements are stipulated in Agreed Order DE 11081, which is enforced by the Washing State Department of Ecology. It will also cover other costs associated with the legacy contamination across campus including but not limited to assessments of sites being considered for purchase. The UW anticipates the need to continue the purchase of individual real estate parcels and buildings to enable the Tacoma campus to accommodate future enrollment growth in accordance with the legislatively mandated expansion.

### **Project Supports Statewide Results**

As the UW continues to manage current properties and acquire individual real estate parcels and buildings to enable the Tacoma campus to accommodate future enrollment growth in response to the legislatively mandated expansion, it is necessary to remediate the land.

#### Specific Benefits, Affected Programs and Funding Strategy

The Remedial Investigation leads to feasibility studies, which lead to clean-up and other management practices, which benefit the ecosystem, residents and visitors. The acquisition of additional parcels within the approved UW Tacoma 46-acre footprint will provide the critical land capacity for UW Tacoma to meet the building needs identified in the UW Tacoma Master Plan.

### Location

City: Tacoma

County: Pierce

Legislative District: 027

### **Project Type**

Acquisition - Land

### **Growth Management impacts**

The Growth Strategies legislation requires state agencies to comply with local land use regulations adopted pursuant to the Growth Management Act, which the University of Washington acknowledges through the development of the Tacoma Campus Master Plan which was approved by the Tacoma City Council and by the UW Board of Regents. The proposed project is consistent with the Tacoma Campus Master Plan which serves a general regulatory guide to UW campus land use development.

# 360 - University of Washington Capital Project Request

2021-23 Biennium

Version: 03 21-23 Capital Request FINAL

Report Number: CBS002 Date Run: 9/14/2020 7:08AM

Project Number:	40000024
Project Title:	T-Wing Renovation - Phase 3
Project Class:	Preservation

### Description

Starting Fiscal Year: 2024 Agency Priority: 10

### **Project Summary**

FUTURE REQUEST. The University of Washington will request \$20M in the 23-25 biennium to fund a predesign, design work and enabling projects for the third phase of the Magnuson Health Sciences T-Wing - Renovation/Replacement.

### **Project Description**

Third phase of a multi-phased renovation in a 400K GSF fully occupied asset (T-Wing) to address deferred maintenance and new pedagogies. The phase II pre-design funding request will layout the approximate phasing, needs to be addressed and the complexities of a phased project of this magnitude.

### Location

City: Seattle

County: King

Legislative District: 043

### **Project Type**

Remodel/Renovate/Modernize (Major Projects)

### **Growth Management impacts**

The 2019 Campus Master Plan (CMP) is the primary regulatory vehicle for the University's future development, defining both the square footage to be constructed and the geographic location of such development. The CMP applies to the Seattle campus and the University's property located within the Major Institution Overlay, or MIO, and is guided by the City-University Agreement between the University of Washington and the City of Seattle.

# 360 - University of Washington Capital Project Request

2021-23 Biennium

Version: 03 21-23 Capital Request FINAL

Report Number: CBS002 Date Run: 9/14/2020 7:09AM

Project Number: 40000051

Project Title: Bagley Hall - Renovation/Replacement (A&S) - Phase 1 Project Class: Preservation

### Description

Starting Fiscal Year: 2024 Agency Priority: 11

### Project Summary

FUTURE REQUEST. The University of Washington will request \$1M in the 23-25 biennium to fund a predesign study for the multi-phase renovation/replacement of Bagley Hall.

### Project Description

The top R1 Chemistry and Chemical Engineering departments in the world have tightly integrated research and teaching programs where new discoveries in basic chemical sciences translate into real-world solutions via engineering applications. The UW has two world-class departments of Chemistry and Chemical Engineering with vibrant research programs in basic and applied chemical sciences and engineering. Despite the broad overlap of common areas of excellence in research and pedagogy, our departments have yet to capitalize on their synergies. These departments are currently housed in physically separated, aging, and high-risk facilities (Bagley Hall and Benson Hall), which lack available and appropriate space needed to build on our areas of common interests and develop bold new research and education initiatives.

We propose a renovated/replacement Chemical Sciences and Engineering Building (CSB) that will enable a new mode of science where **curiosity-driven chemical research can transform into real-world applications** in real-time. Faculty members from the Chemistry and Chemical Engineering departments will be housed in one building. This will provide unique opportunities for education and discovery. We envision a chemical science cluster of excellence with the presence of the renovated/replacement building linking the existing Chemistry Building and Bagley Hall with interdisciplinary research centers such as MolES and NanoES. The proposed joint building is not without precedent. Several large universities with highly ranked Chemistry and Chemical Engineering programs have strong links between the two departments. These include UC Berkeley, University of Illinois and The Ohio State University.

The renovated/replacement building will build on existing common areas of research excellence. The discovery and applications of advanced materials for clean energy applications is one of the most prominent examples of successful collaborations between our units. Faculty from both departments are heavily involved in the UW Molecular Engineering and Sciences Institute, the joint UW/PNNL materials institute (NW IMPACT), a newly funded DOE Energy Frontier Research Center (PI, François Baneyx), the NSF Materials Research Science and Engineering Center (PI, Daniel Gamelin), Washington Clean Energy Institute (Director, Dan Schwartz and Chief Scientist David Ginger). These efforts have also naturally supported growing efforts in the materials science aspects of UW QuantumX and new quantum information technologies.

Beyond this most well-known area, other established and emerging areas of collaboration between Chemistry and Chemical Engineering include synthetic biology, basic and applied polymer science and engineering, applications of machine learning and AI across a spectrum of computational molecular science and engineering activities and chemical catalysis and reaction engineering.

A more thorough integration of these joint research activities would enhance the ability of both units to attract and retain world-class faculty, carry out impactful long-term research projects, attract more research funding, increase the number of joint appointees across both units and grow our capacity to collaborate with PNNL in a more integrative fashion.

The renovated/replacement building will provide unique education opportunities for undergraduate and graduate

students at the University of Washington . Like research, our units already have nascent examples of exciting collaborative teaching outcomes. ChemE and Chemistry faculty are successfully leading a five year, \$3M NSF effort to develop a sustainable and cohesive graduate curriculum at the nexus of data science and chemical sciences and engineering. Moreover, our faculty have sought ways to expand traditional chemistry course offerings at the undergraduate level with a more

applied/chemical engineering focus (e.g., "quantum mechanics for chemical engineers"). Unfortunately, our units have not had the opportunity or cause to more cohesively co-develop these course offerings, leaving missed opportunities, for example to expand course offerings into both departments and also gain operational efficiencies that come with developing labs and classes that are more tightly integrated. Shared physical spaces would significantly enhance our ability to build on these promising starting points.

# 360 - University of Washington Capital Project Request

2021-23 Biennium

Version: 03 21-23 Capital Request FINAL

Report Number: CBS002 Date Run: 9/14/2020 7:09AM

Project Number: 40000051

Project Title:Bagley Hall - Renovation/Replacement (A&S) - Phase 1Project Class:Preservation

### Description

Location

City: Seattle

County: King

Legislative District: 043

### **Project Type**

Remodel/Renovate/Modernize (Major Projects)

### **Growth Management impacts**

The 2019 Campus Master Plan (CMP) is the primary regulatory vehicle for the University's future development, defining both the square footage to be constructed and the geographic location of such development. The CMP applies to the Seattle campus and the University's property located within the Major Institution Overlay, or MIO, and is guided by the City-University Agreement between the University of Washington and the City of Seattle.

# 360 - University of Washington Capital Project Request

2021-23 Biennium

Version: 03 21-23 Capital Request FINAL

Report Number: CBS002 Date Run: 9/14/2020 7:09AM

Project Number:	20091001
Project Title:	Miller Hall Renovation
Project Class:	Preservation

### Description

Starting Fiscal Year: 2026 Agency Priority: 12

### **Project Summary**

FUTURE REQUEST. The University of Washington will request \$7M in the 25-27 biennium to fund design and enabling projects for the renovation of Miller Hall. Funding for construction will be requested in the 27-29 biennium. The College of Arts & Sciences will be contributing one third (\$25M) of the proposed overall project funding.

### **Project Description**

### **Background:**

Miller Hall was originally built in 1922 and was partially renovated in 1962. Miller Hall was one of the 15 buildings identified for renovation in the 2004 "Restore the Core" program. As one of the buildings on the UW's Critical Building List, this building is an integral part of the campus framework. Today, all the building systems in Miller Hall are long past their useful life and require comprehensive replacement with code-compliant energy conserving, structural (seismic strengthening) mechanical, electrical, plumbing, and fire/life safety systems. Restoration of this historic building to arrest further decline and sustain its cultural and architectural character is planned. Miller Hall currently houses the College of Education and serves as a staple classroom facility for the UW for undergraduate and professional studies.

### **Facility Limitations:**

While the College of Education continues to grow and thrive, Miller Hall lacks the facilities that support the innovation, research and quality instruction that define our outstanding reputation. Programs have surpassed the physical limits of the building; a series of small to moderate remodels spanning over the last 90 years have resulted in increasingly smaller, less adaptable spaces that do not meet current needs or teaching pedagogy. Of pressing importance today is the mismatch between the reputation/future of our College and Miller Hall's ability to advance our impact/mission. The College resides in a beautiful but "old school" building that does not align with our values and programming.

This renovation addresses the scope of work and funding necessary for a major building renovation of the approximately 73,200 gross square foot Miller Hall. One of 15 buildings identified for renovation in the 2004 "Restore the Core" program, and included on the UW's Critical Building List, restoration of this historic building would arrest further decline and sustain Miller Hall's cultural and architectural character. In addition, all building systems are long past their useful life and require comprehensive replacement with code-compliant energy conservation, structural (seismic strengthening), mechanical, electrical, plumbing, and fire/life safety systems.

#### Program Growth:

When Miller Hall was last considered for a remodel (over ten years ago) we served approximately 700 graduate students; today we serve 1400 undergraduate and graduate students. The academic space needed to support the additional 700 students has forced instruction outside of CoEdu's home and into the broader campus where instruction occurs in spaces not matched to our teaching pedagogy. Our impact and success in educating Washington's youth is most visible away from Miller Hall in the schools where our programs, students, and alumni are at work. Miller Hall as currently configured does not provide an effective home for our current students, for our faculty and administrators, or for the important research we do.

#### Program Goals:

The Miller Hall renovation will support key priorities for a reimagined academic environment to serve the needs of their faculty, researchers, students, and alumni.

- Provide collaborative teaching and workspaces that mirror the work in the community, reflect the core values of inclusion, and model innovation in teaching and learning practices.

- Create dedicated and intentional spaces for students and innovative spaces for faculty collaboration to increase recruitment and retention.

- Increase instructional capacity and program enrollment, which will help meet the State's teacher and leadership shortage and provide a more diverse educator workforce to directly address the racial imbalances in Washington.

- Serve as a true home for the College of Education that connects students across programs and disciplines, faculty,

### UW PROGRAMMATIC PROJECTS Request Summaries

#### College of Engineering Interdisciplinary/Education Research Ctr. - \$45.5M for Construction

The University of Washington is requesting \$45.4M in state funding in the 21-23 biennium for the construction phase of the College of Engineering (CoE) Interdisciplinary & Education Building (EIEB).

The new facility will provide much needed capacity to alleviate existing deficits within the College of Engineering, and provide student services and a "home base" for the freshmen and sophomore classes. The facility will provide substantial project and curricular space, balanced with research and faculty office areas to support the growth in student enrollment. In addition, it would also provide more space for industry-sponsored senior Capstone projects, which holistically combine theory, practice, and design. Pairing students with industry professionals opens doors to post-degree employment and strengthens University-industry connections.

#### UW Tacoma (Milgard Hall) - \$36M for Construction

The University of Washington requests \$36M in the 21-23 biennium for the construction phase of the new UW Tacoma Academic Innovation Building (Milgard Hall).

The new 50,000 GSF Academic Innovation Building is expected to enable the institution to serve an additional 500 FTE state-supported students. It will also enable the use of cross laminated timber (CLT) in a major state funded construction project. This project will assist in meeting the legislative mandate to provide a four year curriculum and accommodate the projected increase of students for the next 5–10 years. The building will also allow for enrollment growth in both the Milgard Business School and the UWT Mechanical Engineering program by providing additional capacity in classroom functional spaces and lab spaces. The proposed growth areas are considered in high demand for the underserved South Puget Sound Region which this campus supports.

#### Behavioral Health Teaching Facility – \$191.3M for Construction

The University of Washington requests \$191.3M of funding in the 21-23 biennium for the construction phase of the Behavioral Health Teaching Facility. The state allocated \$33.25M during the 19-21 legislative session to fund the predesign (completed February 2020), and initiate the design and initial enabling projects of the new teaching facility. A total of \$224.5M has been earmarked for the completion of the project.

The Washington State Legislature passed House Bill 1593 in April 2019, partnering with UW Medicine to establish a Behavioral Health Teaching Facility (BHTF) to increase behavioral health services across the state. The siting and design for the new facility accounts for local community needs and resources in close coordination with existing local, regional and state resources. Due to the critical need for additional behavioral health services, thoughtful expediency to open the facility is required.

#### T-Wing Renovation/Addition (Health Sciences Education Building) - \$21.8M Reappropriations

The University of Washington requests \$21.8M of funding reappropriations in the 21-23 biennium for the ongoing construction phase of the Health Sciences Education Building (T-Wing Renovation/Addition).

The Health Sciences Education Building will create flexible spaces, modern technologies and a broad array of environments that adapt to changing pedagogical needs and enable active and team-based learning. This project provides 110K GSF of new education space and enable the phased renovation of the existing space in the MHSC T-Wing. The project will provide a shared instructional facility for the six schools of Health Sciences (Dentistry, Medicine, Nursing, Pharmacy, Public Health and Social Work).

#### Ctr. for Advanced Materials and Clean Energy Research Test Beds (Site W27) \$15M Reappropriations

The University of Washington requests \$15M of funding reappropriations in the 21-23 biennium for the CAMCET Test Beds (Site W27). No additional State funding is anticipated for this project as a Public Private Partnership (P3) will be used to develop the site.

The building will be approximately 340,000 GSF and will house UW clean energy researchers and other public and private sector tenants with compatible research and technologies. Using a P3 procurement method, a developer will design, finance, construct, operate and maintain a development that provides well-integrated core uses aligned with UW goals including classrooms as well as uses such as spaces for dining, meeting and informal gathering that are consistent with the 2019 Campus Master Plan.

#### **Buy Clean Washington Study - \$10K Reappropriations**

The University of Washington requests \$10K of funding reappropriations in the 21-23 biennium for the Buy Clean Washington Study.

Funding was initially provided in the 19-21 biennium for the University of Washington to conduct a study of clean energy building materials and construction practices in collaboration with Central Washington University and Washington State University.

2021-23 Biennium

Version: 03 21-23 Capital Request FINAL

Report Number: CBS002 Date Run: 9/14/2020 7:09AM

Project Number: 30000492

Project Title:College of Engineering Interdisciplinary/Education Research CtrProject Class:Program

#### Description

Starting Fiscal Year: 2018 Agency Priority: 1

#### **Project Summary**

The University of Washington is requesting \$45.4M in state funding in the 21-23 biennium for the construction phase of the College of Engineering (CoE) Interdisciplinary & Education Building (EIEB).

#### **Project Description**

Please see attachment for answers to the "Project Description" questions.

#### Location

City: Seattle

County: King

Legislative District: 043

#### **Project Type**

New Facilities/Additions (Major Projects)

#### **Growth Management impacts**

The 2019 Campus Master Plan (CMP) is the primary regulatory vehicle for the University's future development, defining both the square footage to be constructed and the geographic location of such development. The CMP applies to the Seattle campus and the University's property located within the Major Institution Overlay, or MIO, and is guided by the City-University Agreement between the University of Washington and the City of Seattle.

#### New Facility: Yes

#### How does this fit in master plan

This project has been designed under and is compliant with the 2019 CMP.

Report Number: CBS002 Date Run: 9/14/2020 7:10AM

Project Number:20102002Project Title:UW TacomaProject Class:Program

#### Description

Starting Fiscal Year: 2018 Agency Priority: 2

#### **Project Summary**

The University of Washington requests \$36M in the 21-23 biennium for the construction phase of the new UW Tacoma (UWT) Academic Innovation building (Milgard Hall). The new 50,000 GSF Academic Innovation Building is expected to enable the institution to serve an additional 500 FTE state-supported students. It will also enable the use of cross laminated timber (CLT) in a major state funded construction project. This project will assist in meeting the legislative mandate to provide a four year curriculum and accommodate the projected increase of students for the next 5–10 years. The building will also allow for enrollment growth in both the Milgard Business School and the UWT Mechanical Engineering program by providing additional capacity in classroom functional spaces and lab spaces. The proposed growth areas are considered in high demand for the underserved South Puget Sound Region which this campus supports.

#### **Project Description**

#### History of the project or facility:

The University of Washington Tacoma was founded in 1990 to serve and provide access to higher education for place and time-bound students in the South Puget Sound, and to act as a catalyst for revitalizing downtown Tacoma. With limited space and funding, UW Tacoma has done both. UW Tacoma grew from a plus-2 university, serving only juniors and seniors to a four year university with on-campus housing and an enrollment of 5,200 with a growth rate of 4-5% per year. Over time UW Tacoma has served a broadening demographic and worked to offer more fields of study, especially those in high demand. As enrollment and demand continue to grow, UW Tacoma is working to meet the challenge and to increase the high-quality educational options in the South Sound and throughout Washington.

In 2016, the need for additional classroom and lab capacity on the UW Tacoma campus was identified. The University requested funds for this predesign in September 2016 and funding was approved in February 2018. Specific needs beyond enrollment growth were identified in the fields of Mechanical Engineering, Cybersecurity, Industrial Engineering, Environmental Engineering, and Business. These needs still exist.

#### University programs addressed or encompassed by the project:

The University programs addressed by the project are primarily Mechanical Engineering and Business in the first phase. In the full vision, Mechanical Engineering, Civil Engineering, and Business will be affected. Since the new building will free up existing lab and classroom space, other academic programs will have the ability to grow into vacated space.

The design team utilized focus groups, support from peer institutions, questionnaires, building visits, and registrar data analysis to identify the types and sizes of spaces required to meet program and campus needs and goals. Business school pedagogy and campus-wide need for efficiency drove the request for large classrooms with adjacent group rooms. Adding a new Mechanical Engineering program requires specialized labs, the general specifications for which were outlined by the lab consultant, with input from the University and the design team. Office and support space are a small portion of the identified need, included to accommodate new faculty and staff, primarily for Mechanical Engineering. Creating a home with a public face for the Milgard Business School's many Centers, and Engineering's growing Centers, will not only make these critical resources accessible to students and business/industry partners, but will also offer opportunities for collaboration between the Business and Engineering programs. The hub for Innovation Centers includes spaces like interview rooms and a board room, ideal for connecting students to professionals, and therefore job opportunities. Unscheduled collaboration space offers opportunities for innovative interdisciplinary work, while meeting the particular needs of Business School students, who typically have group assignments but struggle to find space to work together.

#### Integral to Achieving Statewide Policy Goals:

Provide degree targets, and describe how the project promotes improvement on 2014-15 degree production totals in the OFM four-year public dashboard.

a. Indicate the number of bachelor's degrees awarded at the close of the 2014-15 academic year.

2021-23 Biennium

Report Number: CBS002 Date Run: 9/14/2020 7:10AM

Project Number:20102002Project Title:UW TacomaProject Class:Program

#### Description

Bachelor total: 1,294

#### b. Indicate the number of bachelor's degrees awarded in high-demand fields at the close of the 2014-15 academic year.

Bachelor High Demand: 385

*c. Indicate the number of advanced degrees awarded at the close of the 2014-15 academic year.* Advanced total: 287 Advanced High Demand:81

### Describe how the project promotes access for underserved regions and place-bound adults through distance learning and/or university centers:

Promoting access to higher education for students from underserved regions and place-bound students is at the core of UW Tacoma's mission. As stated in the project/facility history, UW Tacoma was founded in 1990 to serve and provide access to higher education for upper-division place- and time- bound students in the South Puget Sound and to act as a catalyst for revitalizing Tacoma (See Predesign Report, Section 2, pages 16-17 and 26-27).

#### Challenges:

• Students from underserved regions & place-bound students: UW Tacoma serves many traditionally underserved and minority communities. 77% of all UW Tacoma students come from Pierce and King counties alone. Many of these students are place-bound, and therefore limited to local opportunities. If degrees in Engineering and Business are not available here, these students will not have access to associated potential economic opportunities.

• First generation students: Many local first generation college students are uncomfortable in larger, more urban university settings. For many students who are first in their families to attend college or who are from traditionally underserved communities, traveling to larger urban universities poses a significant barrier.

#### Goals:

• Increase access and diversity. The first point of UW Tacoma's mission is to "Expand access to higher education in an environment where every student has the opportunity to succeed." This campus serves the diverse South Sound community, and this project will increase access to Engineering and Business degrees for this community.

• Increase economic opportunity to place-bound students and underserved populations. This project increases access to Engineering and Business degrees, thereby significantly increasing enrollment for place-bound students or residents of underserved regions. Employers in this area are actively recruiting women and employees from diverse backgrounds.

### a. Is distance learning or a university center a large and significant component of the total project scope? If yes, to what degree of percentage?

All new classrooms should have capabilities for distance learning to reach underserved regions and place-bound students. The design team will need to further investigate the appropriate technology and equipment to serve these needs.

### *b.* Is the project likely to enroll a significant number of students who are place-bound or residents of underserved regions?

The project is likely to enroll a significant number of students who are place-bound or residents of underserved regions. UW Tacoma was established to serve students who are place-bound or residents of underserved regions. The new building will increase access to Engineering and Business degrees for South Sound region. Currently, there are few local universities in Washington that are accessible to place-bound students of the South Sound region. They are too expensive, outside the commute area, or lack comparable degree offerings (See Predesign Report, Section 2, pages 16-17 and 26-27).

 $\cdot$  77% of all enrolled UW Tacoma students are from local counties (Pierce and King).

· 63% of freshmen are first generation students.

2021-23 Biennium

Version: 03 21-23 Capital Request FINAL

Report Number: CBS002 Date Run: 9/14/2020 7:10AM

Project Number:20102002Project Title:UW TacomaProject Class:Program

#### Description

56% of all students come from diverse backgrounds.

• Among the top 50 most diverse campuses in the U.S.

93% of students are in-state with many place-bound, and from South Sound counties.

#### Integral to Campus/Facilities Master Plan:

#### a. Describe the proposed project's relationship and relative importance to the institution's most recent Campus/Facilities Master Plan or other applicable strategic plan.

The UW Tacoma Master Plan from 2003 and continuing in 2008-09 planned for development on the proposed site as campus expansion up the hill to the west. The Master Plan massing was intended to continue a strong building edge, consistent with the south façade of the Science Building, for the Hillclimb. The massing lines are intended to preserve view corridors through campus and to Mt. Rainier. A portion of Court C was determined to be vacated as part of the development (See Predesign Report, Section 4.6.0, pages 122-123).

The proposal serves as the next step in realizing the Master Plan vision, helping to extend the campus to Market St. and revitalizing the urban district. The full realization of the "boomerang" massing will create the Hillclimb's edge, and a portion of the site south of the building will become the extended Hillclimb landscape area between Jefferson and Market.

Regarding campus infrastructure, the project could house elements that serve as a central plant for future development on campus. See description in Section 4.4.2. As a result, this project could help future projects meet UW Tacoma's sustainability goals.

The proposal will be a vital component of campus circulation. Currently there is no all-hours accessible path from Jefferson Avenue up to the University Y Student Center. Access is provided through Pinkerton Hall's elevator from Jefferson to Court C. Once on Court C people can access the Court 17 building elevator located in the southeast corner of its parking garage, which provides access to Market Street. However, level 2 of Pinkerton closes at 4:30 PM due to the operational hours of the School of Urban Studies, which is housed there. So, although the building is open until 10:00 PM, the elevator is only usable until 4:30 PM. Also, Court C is paved with brick and likely does not meet accessibility standards for slopes and surfaces. Therefore, the development of the Academic Innovation Building will provide a vital link between Jefferson and Market for students, faculty and staff.

### b. Does the project follow the sequencing laid out in the Master Plan (if applicable)? If not, explain why it is being requested now.

The project follows the sequencing laid out in the Master Plan. The Master Plan states that in "phasing this development over the next ten years, it is important to prioritize buildings that will help define the central open space between Pacific Avenue and Jefferson Avenue. The project will do this by supporting the extension of the Hillclimb.

#### Integral to institution's Academic Programs Plan:

Describe the proposed project's relationship and relative importance to the institution's most recent Academic Programs Plan. Must the project be initiated soon in order to:

#### a. Meet academic certification requirements?

The project must be initiated for the new Mechanical Engineering program to meet ABET academic certification requirements. Mechanical Engineering programs require specialized labs that are not available on campus or able to be adapted from other space on campus. Without a new building, the Mechanical Engineering Program would need to acquire leased space that would not provide a sustainable or cost-effective long-term solution, could impact the quality of the educational experience, and create inefficient access to labs from the campus.

2021-23 Biennium

Version: 03 21-23 Capital Request FINAL

Report Number: CBS002 Date Run: 9/14/2020 7:10AM

Project Number:20102002Project Title:UW TacomaProject Class:Program

#### **Description**

#### b. Permit enrollment growth and/or specific quality improvements in current programs?

The project must be initiated soon to permit enrollment growth and quality improvements in current programs. UW Tacoma is growing rapidly to meet the needs of South Sound communities. Currently, the campus is turning away students, specifically in the School of Engineering and Technology and Milgard School of Business, due to insufficient space and resources.

The School of Engineering and Technology growth is limited by the projection that enrollment growth will reach maximum current capacity in the fall quarter of 2019. The enrollment growth will reach a 0% growth in 2019 without a new building.

The Milgard School of Business enrollment growth has reached its maximum capacity. Currently, Milgard's applicants outnumber its capacity by 12%. Since the School has run out of space, its growth without a new building will be 0%. The new building would provide space for the program to expand and serve local students and businesses.

#### c. Permit initiation of new programs?

The two new Engineering programs, Mechanical and Civil Engineering, as stated above, require specialized labs that are not available on campus or able to be adapted from current space on campus. These programs will be significantly impacted if the building is not available and alternative leased space is required.not be able to exist without the new building. (Phase 1 includes Mechanical Engineering facilities, Civil Engineering facilities are planned for Phase 2.)

#### Enrollment Growth:

a. Identify the number of additional full-time equivalent (FTE) state-supported students the project is expected to enable the institution to serve when the space is fully occupied. Describe the method by which the number of additional FTEs who can be accommodated by the proposed space has been calculated, and provide and explain the enrollment analysis indicating probable student demand and enrollment from project completion to full occupancy.

The project is expected to enable the institution to serve 500 additional FTE state-supported students when the space is fully occupied. This was calculated based on the classroom and lab Assignable Square Feet (ASF) proposed for the project. In the absence of state-wide standards for calculating FTE per ASF, the project team looked at the existing campus and forecasts. According to UW Tacoma's Master Plan, the campus needs 371,100 ASF of classroom and lab space to accommodate the forecast for 10,000 FTE, resulting in an ASF of lab and classroom space per FTE of 37.11 ASF/FTE. To be conservative, the project rounded down to 35 ASF per FTE. This project's proposed 17,600 ASF of lab and classroom would accommodate 503 FTE. (This additional square footage brings the UW Tacoma's efficiency to 131 SF/FTE, which is significantly low and more efficient than comparable institutions, which average 360 SF/FTE.) The enrollment projections were calculated by projecting a conservative 4% overall campus enrollment growth, as well as projections specific to adding a new Mechanical Engineering degree. With these projections, the new building will provide adequate program space for the next five to ten years. **b.** Identify how many of the additional FTE enrollments are expected to be in high-demand fields (identified in the <u>OFM</u> statewide public four-year dashboard) and the particular fields in which such growth is expected to occur.

It is expected that 300 FTE out of the total 500 FTE are to be in high-demand fields, specifically Mechanical Engineering.

#### Availability of Space/Utilization on Campus:

#### Describe the institution's plan for improving space utilization and how the project will impact the following:

#### a. The utilization of classroom space

The institution's plan for improving utilization of classroom space is to provide large classrooms, which are in very high demand on campus, in this project. Currently, class size is limited by room size, necessitating faculty to teach multiple repeat sessions

2021-23 Biennium

Version: 03 21-23 Capital Request FINAL

Report Number: CBS002 Date Run: 9/14/2020 7:10AM

Project Number:20102002Project Title:UW TacomaProject Class:Program

#### Description

of the same coursework. While small class sizes benefit students for certain types of content delivery, this repetition of content benefits neither student nor faculty. Both Milgard and School of Engineering and Technology faculty requested larger rooms for 60-70 students in which presentations could be made once, rather than repeated. The faculty time gained by this efficiency could then be used to expand coursework and access within the same amount of faculty time. The "utilization curve" for classrooms is highest toward the larger classrooms (40-45 hours/week) reinforcing the need for this classroom size. The one existing 70-80 person classroom on campus is greatly underutilized because of its poor condition and A/C issues. UW Tacoma has plans to revitalize this classroom to make it usable again. Furthermore, some classrooms are under-utilized due to their lack of appropriate daylight, ventilation, furniture, and technology conditions. The university is working on updating these classrooms which will allow other programs on campus to grow (See Predesign Space Needs Assessment, pages 47, 50-51).

#### b. The utilization of class laboratory space

The specialized labs and lab support spaces needed to launch the new Mechanical Engineering Program and meet curriculum requirements do not already exist on campus. These labs will need to accommodate the size and type of equipment necessary, and to have the capacity for multiple lab sections meeting at the same time without scheduling conflicts as the program grows.

Current labs will increase utilization due to an increase in general science education requirements for the new Engineering students. The University plans on utilizing freed up space that the new building will provide to accommodate this increase in lab use (See Predesign Space Needs Assessment, pages 47, 54-55).

#### Efficiency of Space Allocation:

a. For each major function in the proposed facility (classroom, instructional labs, offices), identify whether space allocations will be consistent with Facility Evaluation and Planning Guide (FEPG) assignable square feet standards. To the extent any proposed allocations exceed FEPG standards, explain the alternative standard that has been used, and why. See Chapter 4.0 of the Project Evaluation Guidelines for an example. Supporting tables may be included in an appendix.

Hacker Architects used past higher education building experience as a starting point for sizing spaces. The space allocations were then cross-checked against State Facilities Workplace Strategies and Space Use Guidelines (2017), and Facilities Evaluation and Planning Guide (FEPG) (1994). Project program areas are in line with, or more efficient than, the recommendations (See Predesign Space Needs Assessment, page 48).

Comparison to currently recognized space planning guidelines: Strategies from State Facilities Workplace Strategies and Space Use Guidelines should be applied to assign faculty and staff workspace in the design phase of the project. These guidelines help allocate amounts and types of space based on the privacy users require, and the type of work they do. Applying these guidelines can help reduce the total space required for faculty and staff offices.

#### b. Identify the following on form CBS002: See attached tables (page 9)

- 1. Usable square feet (USF) in the proposed facility: 33,500 USF
- 2. Gross square feet (GSF): 50,000 GSF (phase 1)
- 3. Building efficiency (USF divided GSF): 67% efficiency factor

#### Reasonableness of Cost:

Provide as much detailed cost information as possible, including baseline comparison of costs per square foot (SF) with the cost data provided in Chapter 5.0 of the Higher Education Capital Project Scoring Process Instructions and a completed <u>OFM C-100 form</u>. Also, describe the construction methodology that will be used for the proposed project.

2021-23 Biennium

Version: 03 21-23 Capital Request FINAL

Report Number: CBS002 Date Run: 9/14/2020 7:10AM

Project Number:20102002Project Title:UW TacomaProject Class:Program

#### Description

If applicable, provide Life Cycle Cost Analysis results demonstrating significant projected savings for selected system alternates (Uniformat Level II) over 50 years, in terms of net present savings.

Based on the development of a target value budget of \$50 million for the program spaces identified, the University of Washington is requesting \$40 million for Phase 1 of the Academic Innovation Building. To improve schedule outcomes and enhance value, the University intends to deliver this project through a progressive design-build process. The project capital request will be for a full design-build delivery method, with 10% (\$4M) of the state request (\$40M) appropriated in the 2019-2021 biennium to start design, and the balance of the state request (\$36M) for the build phase in the 2021-2023 biennium. The balance of funding (\$10M) will be secured through alternative sources, such as donor funds. The University would enter into a preliminary agreement with the design builder during the 2019-2021 biennium to complete the design development phase in June 2021, and be ready to complete the design and construction in the 2021-2023 biennium. This approach will allow the University to optimize the schedule and budget efficiencies of a progressive design-build delivery. The progressive design build delivery also allows the University to be involved early in the process and contribute to early design phase decisions. The UW Capital Planning and Development Office (CPD) will manage the Academic Innovation Building project and is targeting Fall 2023 for occupancy. Please reference sections four and five and Appendix A3 of the predesign report for further information on the budget and schedule and attached C-100 and Life Cycle Cost Analysis.

## Project Number: 40000038

Project Title: Behavioral Health Teaching Facility Project Class: Program

### Description

Starting Fiscal Year: 2020 Agency Priority: 3

#### **Project Summary**

The University of Washington requests \$191.3M of funding in the 21-23 biennium for the construction phase of the Behavioral Health Teaching Facility. The state allocated \$33.25M during the 19-21 legislative session to fund the predesign (completed February 2020), and initiate the design and initial enabling projects of the new teaching facility. A total of \$224.5M has been earmarked for the completion of the project.

#### **Project Description**

The Washington State Legislature passed House Bill 1593 in April 2019, partnering with UW Medicine to establish a Behavioral Health Teaching Facility (BHTF) to increase behavioral health services across the state. The siting and design for the new facility accounts for local community needs and resources in close coordination with existing local, regional and state resources. Due to the critical need for additional behavioral health services, thoughtful expediency to open the facility is required.

The state allocated \$33.25 million during the 19-21 legislative session to fund the predesign (completed in February 2020), and initiate the design and initial enabling projects of the new teaching facility. A total of \$224.5 million has been earmarked for the completion of the project.

Project Goals:

1. **Integrate**: Innovative and comprehensive care, offered in a healing environment, to help patients with behavioral health recovery and treatment.

2. Heal: Alternative to existing long-term (90/180-day) civil commitment beds at Western State Hospital.

3. Educate: Training site for the next generation of health and behavioral health care providers for WA State.

4. Innovate: Support the first of its kind 24/7 365 day a year tele-psych program.

5. Safeguard: Ensure safe environment for patients, providers, staff, trainees and visitors.

6. Sustain: Project design to incorporate required infrastructure upgrades & connectivity for hospital's essential services.

7. Honor: Preserve and evolve campus vision, including how patients and visitors experience the campus.

8. **Welcome**: Provide a welcoming and healing environment that will raise public awareness about the importance of behavioral health and its impact to the health of all our families and our communities.

### Location

City: Seattle

County: King

Legislative District: 043

### **Project Type**

New Facilities/Additions (Major Projects)

### Growth Management impacts

The City of Seattle's Major Institutions Land Use Code applies to several large health care and educational institutions in the Seattle area. It establishes use restrictions, growth boundaries, as well as height restrictions. It regulates development by the major institution within 2,500 feet of the institution's overlay district boundary. The institution must comply with the underlying zoning standards or prepare a master plan which establishes new standards or prepare a master plan which establishes new standards tailored to the needs of the institution and the surrounding community.

### New Facility: Yes

### How does this fit in master plan

This project is compliant with the Northwest Hospital Institutional Master Plan.

#### Project Number: 30000486

Project Title: Health Sciences Education - T-Wing Renovation/Addition Project Class: Program

### Description

Starting Fiscal Year: 2018 Agency Priority: 4

#### **Project Summary**

The University of Washington requests \$21.8M of funding reappropriations in the 21-23 biennium for the ongoing construction phase of the Health Sciences Education Building (T-Wing Addition/Renovation).

#### **Project Description**

This project will provide 110K GSF of new education space and enable the phased renovation of the 493K GSF existing space in the MHSC T-Wing. The project will provide a shared instructional facility for the six schools of Health Sciences (Dentistry, Medicine, Nursing, Pharmacy, Public Health and Social Work).

Although adequate for traditional lecture style teaching, the Magnuson Health Sciences Teaching Center (T-Wing), constructed in 1973, cannot accommodate all existing or new course offerings nor support the advanced learning technologies and space requirements of active team-based learning essential for training health and health care professionals of the 21st Century. Current space limits the options for involving all six schools of Health Sciences for inter-professional and overlapping instructional activities and cutting-edge educational technologies essential to supporting in-person experiential learning, distance and distributed learning, and connections with local, regional, and global community partners. Identified as early as the 2011-2013 State Capital Budget Request 10-Year Plan, a "Health Sciences Teaching Building" long range four-phase plan and subsequent proposal for an incremental Phase I addition has emerged as a top priority for the UW as part of a commitment to create a shared vision of service to people locally and globally. The first phase constructs an addition adjacent to T-Wing, required to meet the immediate need for shared instructional space as well as provide opportunity to decant existing T-Wing functions in anticipation of future phases of renovation and rehabilitation. It will enable the uninterrupted operation of existing and evolving pedagogies while accommodating the growing demands of education space for the health science schools including space for interdisciplinary innovation and collaboration to help transform training for tomorrow's health professional.

#### PROJECT GOAL

Create a Health Sciences Education Building with flexible spaces, modern technologies, and a broad array of environments that adapt to the changing pedagogical needs of the Health Sciences and enable active and team-based learning.

### OBJECTIVES

> Create a hub for the Health Science education and training that fosters interaction, collaboration, and creativity for students and the health professional community.

> Build a centrally located Health Sciences Education Building utilizing the unique adjacencies of research, academic, and clinical programs to train future health professionals in support of affordable, accessible, and high quality 21st Century health care.

> Maintain the outstanding performance of UW's Health Science schools by attracting and retaining the best health and health care professionals to serve the State of Washington.

> Design the building to enable the Health Sciences campus to support the goals of the 2018 Campus Master Plan.

The University of Washington completed the facility predesign with an expenditure of \$623,000 appropriations in the 2015-2017 biennium, which served as the basis for design appropriations totaling \$10M in the 2017-2019 biennium. Concurrently, the UW is requesting appropriations for a Predesign for future phases of the T-Wing Renovation, per the 10-Year Capital Plan.

#### Location

City: Seattle

County: King

Legislative District: 043

### Description

#### **Growth Management impacts**

The 2019 Campus Master Plan (CMP) is the primary regulatory vehicle for the University's future development, defining both the square footage to be constructed and the geographic location of such development. The CMP applies to the Seattle campus and the University's property located within the Major Institution Overlay, or MIO, and is guided by the City-University Agreement between the University of Washington and the City of Seattle.

### New Facility: Yes

### How does this fit in master plan

This project is compliant with our 2019 Campus Master Plan.

### Project Number: 91000016

Project Title: Ctr for Advanced Materials and Clean Energy Research Test Beds Project Class: Program

### Description

Starting Fiscal Year: 2016 Agency Priority: 5

#### **Project Summary**

The University of Washington requests \$15M of funding reappropriations in the 21-23 biennium for the CAMCET Test Beds. No additional State funding is anticipated for this project as a Public Private Partnership (P3) will be used to develop the site.

#### Project Description

The building will be approximately 340,000 GSF and will house UW clean energy researchers and other public and private sector tenants with compatible research and technologies. Using a P3 procurement method, a developer will design, finance, construct, operate and maintain a development that provides well-integrated core uses aligned with UW goals including classrooms as well as uses such as spaces for dining, meeting and informal gathering that are consistent with the 2019 Campus Master Plan.

Identify the problem: The project contribute to a new facility, the Center for the Advanced Materials and Clean Energy Technologies (CAMCET) research building. This facility will address the growing need for teaching and research capacity across Science, Technology, Engineering, and Mathematics (STEM) fields.

What will the request produce: CAMCET will provide a technology rich environment that is unique to the clean technology eduction and business sectors. Clean energy research is a highly specialized field and requires technologically equipped facilities that currently do not exist or are limited at the UW. The facility will provide a collaborative learning and research environment that will enable students and researchers to test and scale discoveries into viable solutions.

How would the request address the problem: CAMCET will be a research and teaching building supporting faculty members from Chemical Engineering, Chemistry, Computer Science & Engineering, Material Science, Physics and Bioengineering. The center will engage students using laboratory based learning with focused collaborative learning with faculty in the Natural Sciences(e.g. Chemistry, Biology, and Physics), Business and the School of Medicine. This highly interdisciplinary field will emphasize engineering at the nano and molecular levels in contrast to traditional large scale process engineering. This building will house advanced learning laboratories, research labs, meeting rooms, multi-disciplinary space, interaction spaces and offices.

Which clientele will be impacted: CAMCET will have large classrooms, STEM learning labs, STEM student project spaces, smaller seminar rooms, research laboratories, and conferencing facilities that will enable enrollment growth projected to be 486 undergraduate FTEs and 280 graduate student FTEs. The undergraduate enrollment growth is driven by the classrooms, learning labs, and student project spaces, whereas the graduate student growth is split between the availability of new CAMCET research lab spaces(enabling greater Ph.D. and Master of Science enrollments) as well as seminar rooms that can accommodate a wide range of graduate-level courses.

<u>Describe how this project supports the agency's strategic master plan:</u> The hallmark of the building will be a culture of students, researcher and industry partners working toward the common goal of accelerating the process for turning new ideas into technical solutions that support a healthy planet.

#### Location

City: Seattle

County: King

Legislative District: 043

### Project Number: 91000016

Project Title:Ctr for Advanced Materials and Clean Energy Research Test BedsProject Class:Program

### Description

#### **Growth Management impacts**

The 2019 Campus Master Plan (CMP) is the primary regulatory vehicle for the University's future development, defining both the square footage to be constructed and the geographic location of such development. The CMP applies to the Seattle campus and the University's property located within the Major Institution Overlay, or MIO, and is guided by the City-University Agreement between the University of Washington and the City of Seattle.

### New Facility: Yes

### How does this fit in master plan

This facility is compliant with our 2019 Campus Master Plan.

## 360 - University of Washington Capital Project Request

2021-23 Biennium

Version: 03 21-23 Capital Request FINAL

Report Number: CBS002 Date Run: 9/14/2020 7:14AM

#### Project Number: 91000022

Project Title: Buy Clean Washington Study Project Class: Program

#### Description

Starting Fiscal Year:2018Agency Priority:6

#### **Project Summary**

The University of Washington requests \$10K of funding reappropriations in the 21-23 biennium for the Buy Clean Washington Study.

#### **Project Description**

Funding is provided for the University of Washington to conduct a study of clean energy building materials and construction practices in collaboration with Central Washington University and Washington State University.

#### Location

City: Seattle

County: King

Legislative District: 043

#### Project Type

Special Programs

#### **Growth Management impacts**
