Pre-defined Filters

Pre-defined filters are customized for WWA users based on current business needs. Pre-defined filters can be used by all agency users but cannot be modified.

- Some pre-defined filters are required when using certain data fields and/or measures. For example, when using any Headcount measure in the Headcount and Personnel Actions universe, ensure the “Actions – Exclude” pre-defined filter is included in your ad hoc query filter.
- Use caution when using pre-defined filters since they will impact the results of your query. Filter descriptions are provided below and it is recommended you familiarize yourself with the purpose of the filter prior to using it.

<table>
